

For the android mobile which **OS is 2.1 or above**, the user could reserve the apk application into the mobile while connecting with PC/ NB. The following instruction is based on Samsung Galaxy i9000.

1.	Download the application “Samsung Kies” from the official website ( <a href="http://www.samsungapps.com/about/onPc.as">http://www.samsungapps.com/about/onPc.as</a> ) and then install to the PC
2.	Activate the “Kies” and connect the Samsung I9000 to the PC via connection cable.
3.	Select the first option “Samsung Kies” in I9000
	
4.	Select the storage position of the application “iProSecu A.M._V1.0.3_2.1.apk”. (i.e. the “Download” folder among “Phone” device)
	
5.	Find out the provided application “iProSecu A.M._V1.0.3_2.1.apk” (i.e. “Applications” → “My Files” → “Download” . )

	
6.	Click the application “iProSecu A.M._V1.0.3_2.1.apk” to install.
