Operation Manual

WARNING & CAUTION

All cautions and warnings on this manual should be noted failure to heed this warning & caution will result in serious damage

WARNING

This symbol indicates that dangerous voltage constituting a risk of electric shock is present within this unit

CAUTION

This symbol indicates that it may cause injury, damage and other harmful results

WARNINGS

	Verify that the voltage is set correctly for user location
	Do not touch the cord with wet hand it may cause severe electric shock 
	Be sure that power is plugged in securely (may cause fire if the connection is unstable)
	Do not pull on the power cord (may cause fire or electric shock if cord is damaged)
	Do not disassemble or reconstruct product (may cause fire, electric shock or defects) 
	When in notice of smoke or weird smell, please stop usage and pull out the power plug and contact the service center (continued usage may cause fire or electric shock)
	Do not place or drop metallic objects (coins, hair pin, metal) or easily flammable products (matches, paper) in the ventilation of the product (may cause fire or electric shock)
	Do not place any liquid filled objects on the product (may cause fire, electric shock or other injuries)
	Avoid direct sunlight, heating equipment and electric equipment (danger of fire)
	Do not install product in areas of high humidity, dust or is soot-covered (may cause fire, electric shock or defects)

 <h1 style="margin: 0;">CAUTIONS</h1>		
	<p>Do not place heavy objects on product (may cause injury)</p>	
	<p>Avoid areas of magnetic fields and severe vibration (may cause defect in product)</p>	
	<p>Do not drop the product or cause sudden impacts</p>	
	<p>This product is heavy be careful when moving this product</p>	
	<p>Avoid installation in cold areas</p>	
	<p>This product is designed to operate under max 40°C</p>	
	<p>Avoid installation in uneven areas (may cause defect in product)</p>	
	<p>To product use hour it uses the all the member cable where becomes the ground connection it wishes</p>	
	<p>When cleaning the product, do not use water, but use a dry cloth to gently wipe the product</p>	
	<p>Before operation, become familiar with all the special features and warning associated with this equipment and read this manual carefully</p>	
	<p>Back up the important data</p>	
	<p>Single phase power supply operation is not recommended to prevent a power supply failure ups is strongly recommended</p>	

INSTALL INSTRUCTION

- 1) This device designed to operate under max 40°C when you install this device in the rack, please consider the max ambient temperature please install this device proper ambient temperature of all part
- 2) Caution : when you install this device in the rack, the operating ambient temperature may be greater than room ambient please consider this condition and simulate the max temperature and install in an environment compatible temperature
- 3) Reduced air flow : installation of this device in a rack should be such that the amount of air flow required for safe operation of this device is not compromised please provide enough space to get the proper air flow
- 4) Mechanical loading - mounting of this device in the rack should be such that a hazardous condition is not achieved due to uneven mechanical loading
- 5) Circuit overloading : please read the rating in the nameplate and consider appropriate power supply and supply wiring
- 6) When you are using like a power strips except direct connections to the branch circuit, please make sure to connect reliable earthing maintained

NOTE: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Connecting Power source to System Using 110V power source Make sure power select switch set to 115V(110V use)

Using 220V power source Make sure power select switch set to 230V(220V use)

NOTICE: For U S A and Canada regions; use only UL listed CSA labeled detachable power cord, 3-conductor, 18 AWG, SVT or SJT type, plug rounding type parallel blade, cord connector body-IEC 320 style to mate with appliance inlet on product

IMPORTANT The only way to disconnect power completely is to unplug the power cord. Make sure at least one end of the power cord is within easy reach so that you can unplug the computer when you need to.

CAUTION: DANGER OF EXPLOSION IF BATTERY IS INCORRECTLY REPLACED. REPLACE ONLY WITH THE SAME OR EQUIVALENT TYPE RECOMMENDED BY THE MANUFACTURER. DISCARD USED BATTERIES ACCORDING TO THE MANUFACTURER' S INSTRUCTIONS.

WARNING

This is a class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

Changes or modifications not expressly approved by the manufacturer could void the user' s authority to operate the equipment.

Warning Label

The system layout may be different from each other model

1.3 System Rear Layout

MP 6016/7016

1.4 Mounting

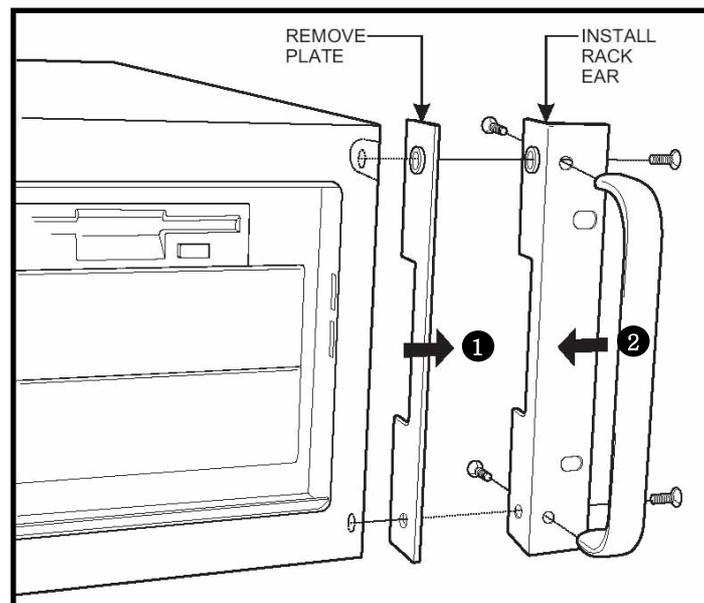

The DVR may be placed on a flat surface, such as a shelf, or it can be install in a 19-inch (48.26 cm) equipment rack

◆ Flat surface mounting

- 1) Before placing the unit on a flat surface, attach the rubber feet (supplied) to the bottom of the DVR. The unit may scratch the surface if the rubber feet are not installed.

◆ Equipment rack mounting

- 1) Remove the remove plate refer to Figure - **1**
- 2) Attach the handles to the rack ears and attach the rack ears to the unit -
- 3) Use four of the supplied 10-32 x 0.75 - inch black screws and finishing washers and mount the assembly to a 19-inch (48.26 cm) rack or console

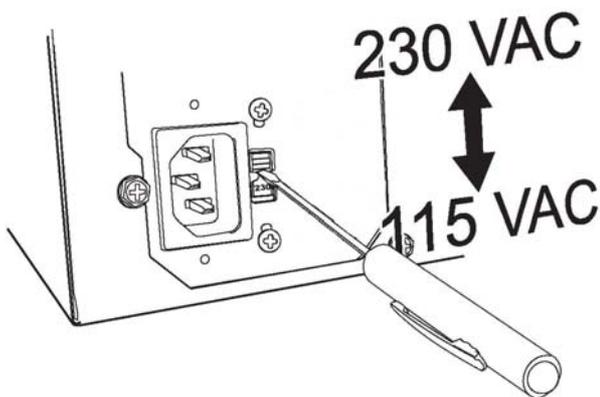

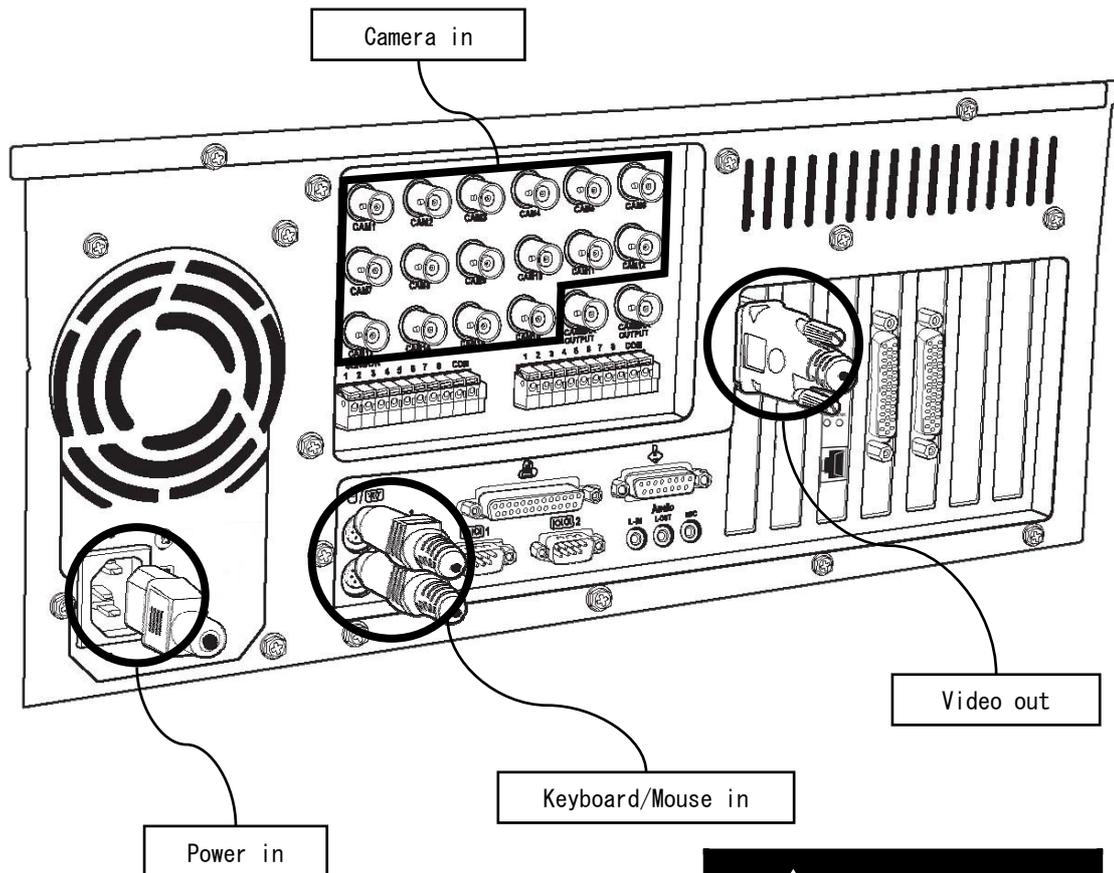

! CAUTION

Slots and openings in the cabinet provide ventilation and prevent it from overheating. Do not block these openings.

1.5 Connection

MP 6016/7016

⚠ WARNING

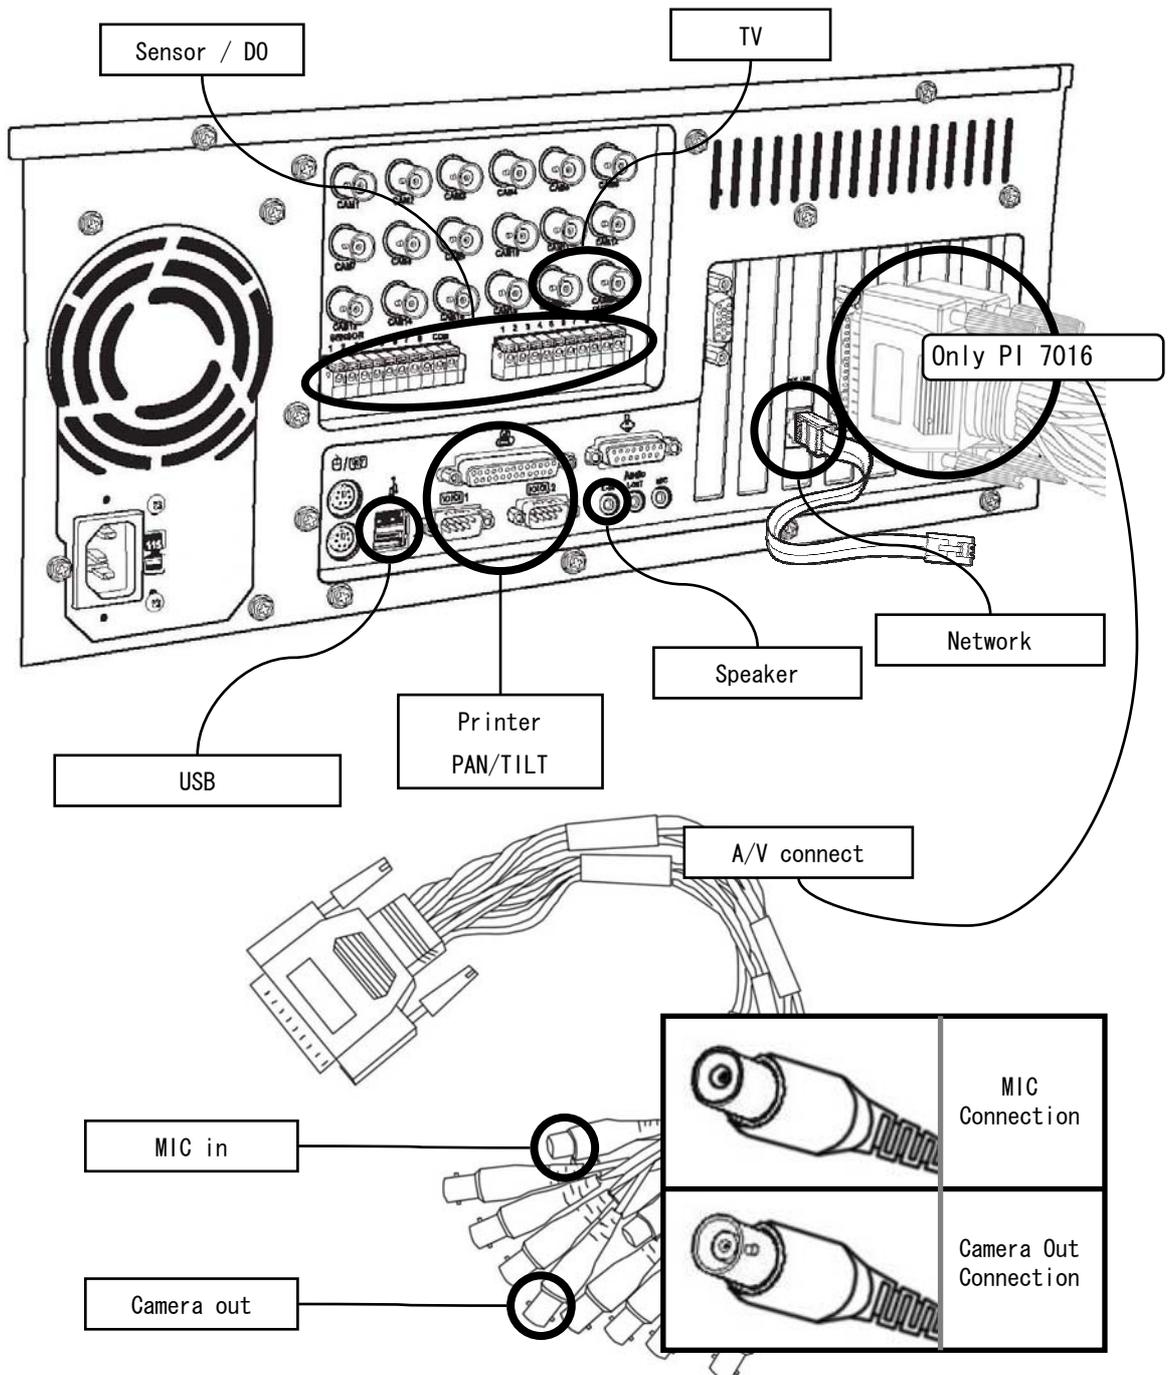

Verify that the voltage is set correctly for user location

⚡ WARNING

The danger will be electric shock and the possibility where it will put on a damage in the human body it is pay attention

- ② Live view
- ③ Camera controller (camera, sensor, D/O, audio)
- ④ View option
- ⑤ Panning view
- ⑥ Volume control
- ⑦ Pan/Tilt (PTZ control window will display when the PTZ control is assigned to a channel)
- ⑧ One channel search
- ⑨ Log-in user
- ⑩ Map search

2.1 Main Menu

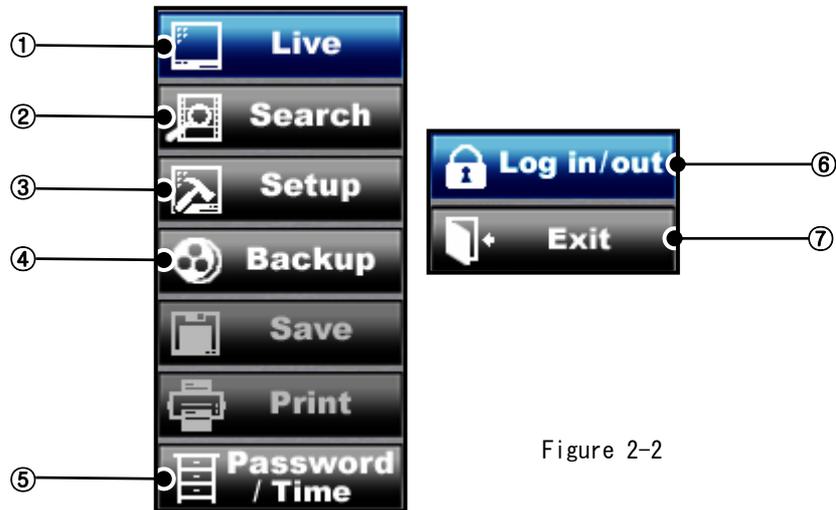

Figure 2-2

- ① Surveillance mode
- ② Search mode
- ③ Set up mode
- ④ Back up mode
- ⑤ User Password and auto change time setting mode
- ⑥ User mode (log in / log out)
- ⑦ System shut down

Disk back up and print function are only activated on search mode

2.2 User Log In

Figure 2-3

- ① User Name - to select registered user
- ② Password - to enter password
- ③ key pad (0-9, reset, del)
- ④ Ok - to confirm for log in
- ⑤ Cancel - to cancel log in

Each user must log in first in order to use and adjust the function according to each user level

Administrator access & give functions to each user

Access level vary to users, if there is no user name then consult with administrator

Log In

1	Figure 2-2	⑥	Go to user mode
2	Figure 2-3	①	Select user name or administrator
3		③	Enter password
4		④	“Ok” to log-in

Log Out

1	Figure 2-2	⑥	Go to user mode
2	Figure 2-3	②	Enter password
3		④	“Ok” to log-out

2.3 Changing Password

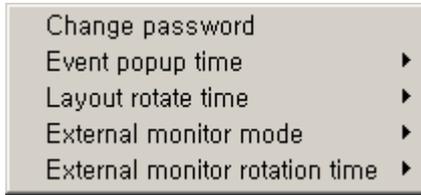

Figure 2-4

- ① Change Password - to change user password
- ② Event popup time - to set Event pop up time (second)
- ③ Layout rotate time - to set rotating time (second)
- ④ External monitor mode - to set External monitor mode (fixed, rotated, event spot mode)
- ⑤ External monitor rotation time - to set time (second)

✓ Change Password

Figure 2-5

- ① Password - enter current password
- ② New Password - enter new password
- ③ Password Confirm - re-enter new password
- ④ key pad (0-9, reset, del)
- ⑤ Ok
- ⑥ Cancel

Change password

1	Figure 2-2	⑤	Go to password mode
2	Figure 2-4	①	Select “Change Password”
3	Figure 2-5	①	Enter current password
4		②	Enter new password
5		③	Re-enter new password
6		⑤	“Ok” to confirm

Set layout rotate time

1	Figure 2-2	⑤	go to password mode
2	Figure 2-4	③	select layout rotate time
3			select the desired time (second)

Set event popup time

1	Figure 2-2	⑤	go to password mode
2	Figure 2-4	②	select layout event popup time
3			select the desired time (second)

Set external monitor

1	Figure 2-2	⑤	Go to password mode
Event Spot or Fixed Mode			
2	Figure 2-4	④	Select event spot or fixed mode in external monitor mode
Rotation Mode			
2	Figure 2-4	④	Select rotation mode in external monitor mode
3		⑤	Select external monitor rotation time
4			Select the desired time (second)

2.4 Surveillance Screen

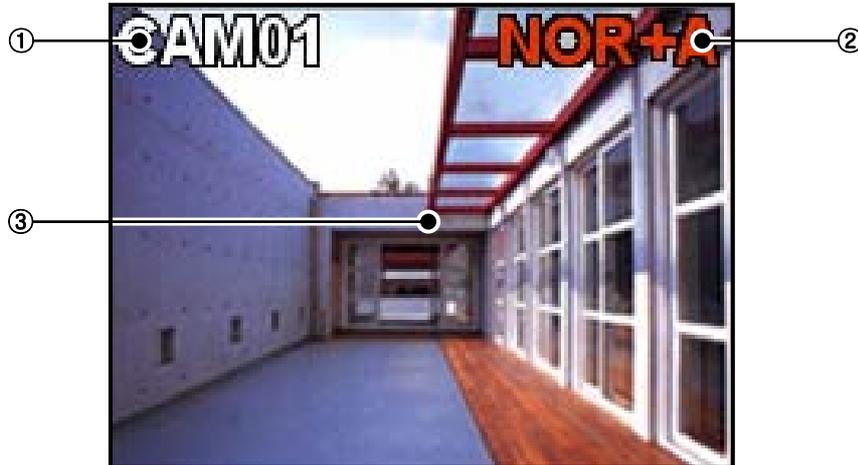

Figure 2-6

- ① Camera Name.
- ② Recording Mode Status.
(NOR - Normal Recording / MOT - Motion Recording / SEN -Sensor recording / MOT+SEN - Motion + Sensor Recording / +A - Audio Recording)
- ③ Camera Image.

As you select a channel you can see and use one big panning view (digital)
You may have blue screen (no image) when there is no input signal or selected disable

2.5 Channel Information

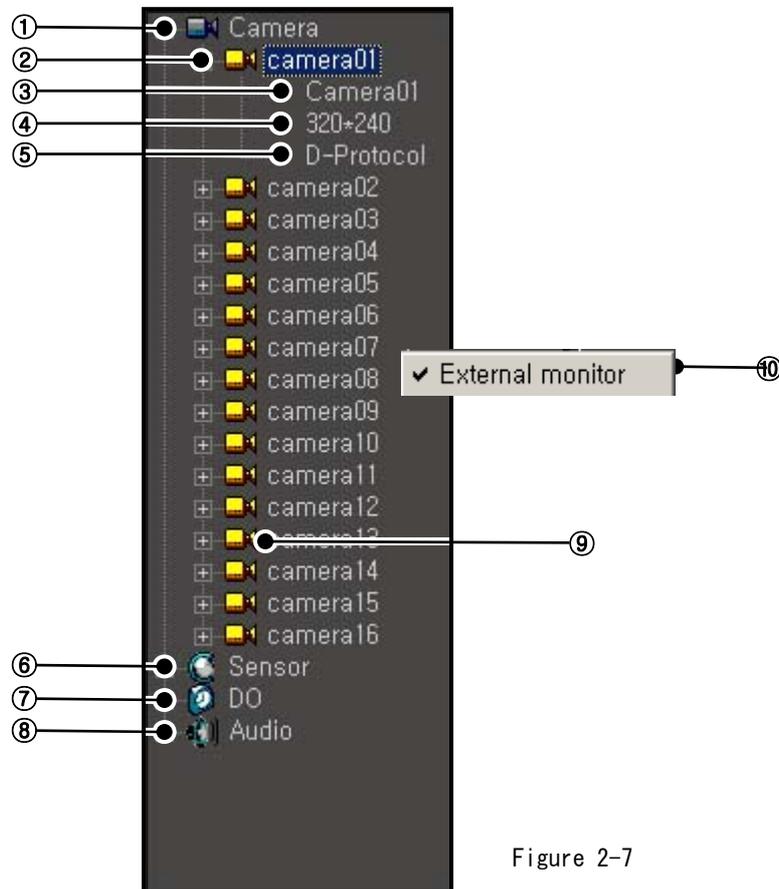

Figure 2-7

- ① Camera - group of camera
- ② Camera01- camera no 1
- ③ External monitor - through out the channel to external monitor. The name for camera no 1
- ④ Selected recording resolution for camera no 1
- ⑤ Pan/Tilt protocol for camera no 1
- ⑥ Sensor - group of sensor (indicates sensor activity)
- ⑦ DO - group of digital out (indicates digital out activation-right click to turn off)
- ⑧ Audio - group of audio (right click for turn on/off)
- ⑨ Camera on recording (twinkles)
- ⑩ External monitor - through out the channel to external monitor.

Using an audio channel

1	Figure 2-7	⑧	Go to audio group
2			Select one of 16 audio channel then click left of mouse
3			Select on from ON/OFF menu

Using other audio channel

1	Figure 2-7	⑧	Go to audio group
2			Select one among not “ON” audio channel and click left of mouse
3			Select on from ON/OFF menu

Disable audio channel

1	Figure 2-7	⑧	Go to audio group
2			Select “ON” audio channel and click left of mouse
3			Select off from ON/OFF menu

2.6 Camera View Option

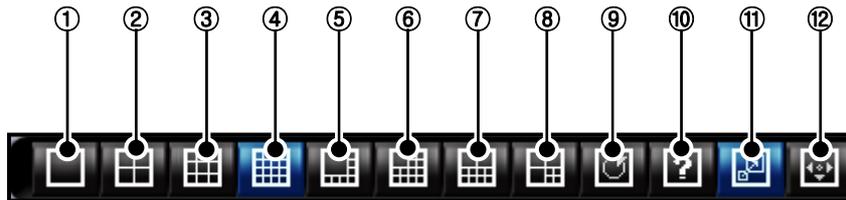

Figure 2-8

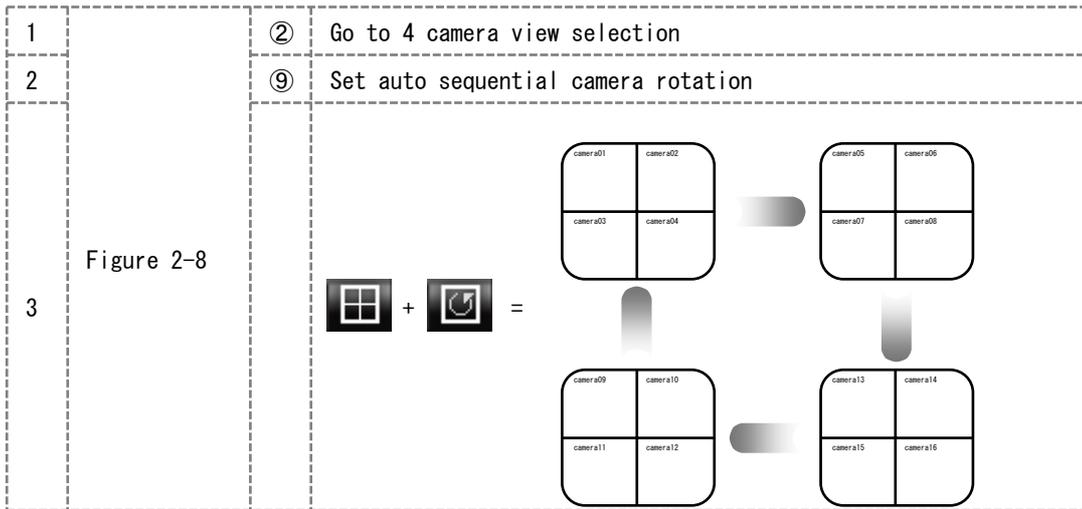

- ① Single camera view selection
- ② 4 camera view selection
- ③ 9 camera view selection
- ④ 16 camera view selection
- ⑤ 1 main + 7 sub-screen selection
- ⑥ 1 main + 12 sub-screen selection
- ⑦ 2 main + 8 sub-screen selection
- ⑧ 3 main + 4 sub-screen selection Sequential camera rotation
- ⑨ Set auto sequential camera rotation
- ⑩ User defined
- ⑪ popup-displays camera detected motion, sensor
- ⑫ Full screen view

View change can be done from /to selected view

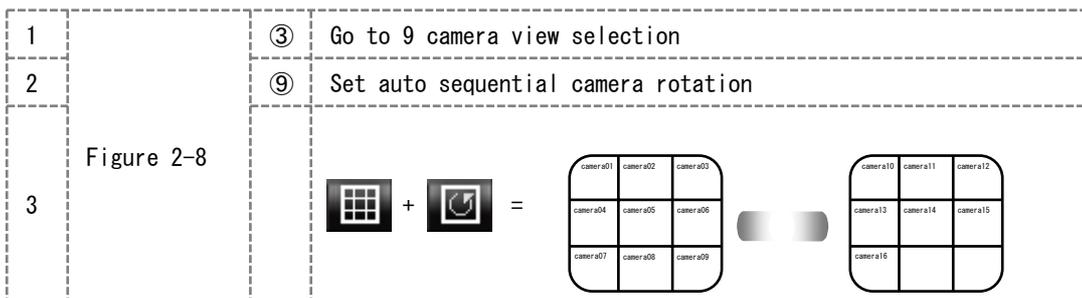

When popup is on at splited view a motion detected view is automatically displayed in full view

Full view at splited view is displayed fully with splited views

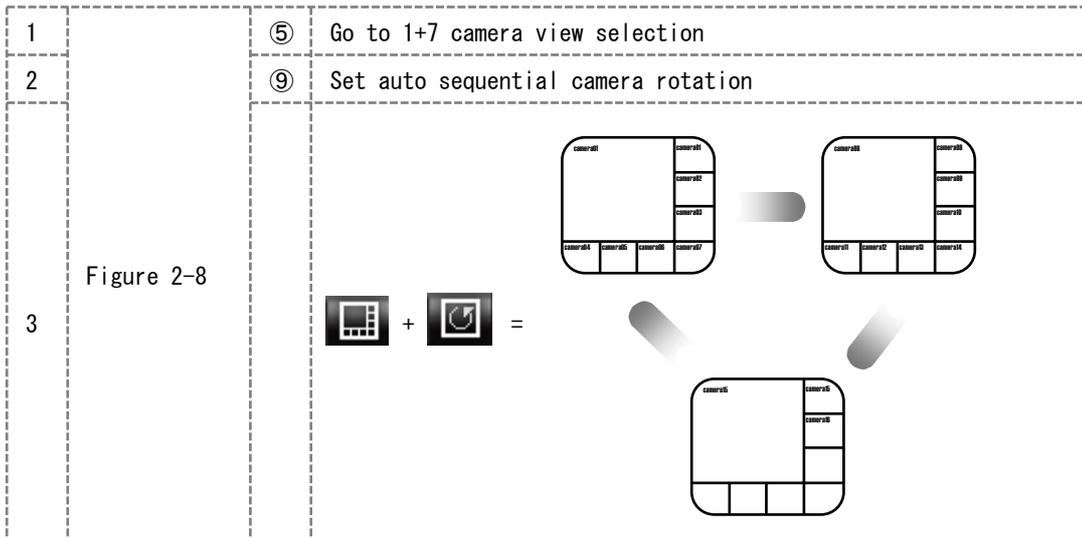

Auto sequential rotation at 4 camera view

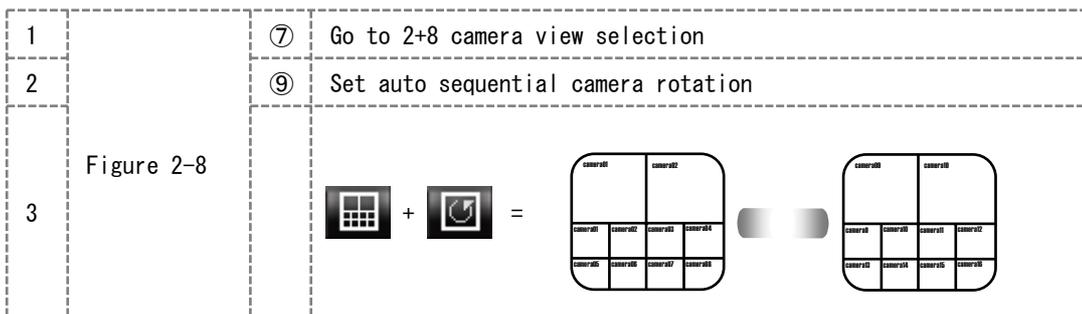

Auto sequential rotation at 9 camera view

Auto sequential rotation at 1+7 camera view

Auto sequential rotation at 2+8 camera view

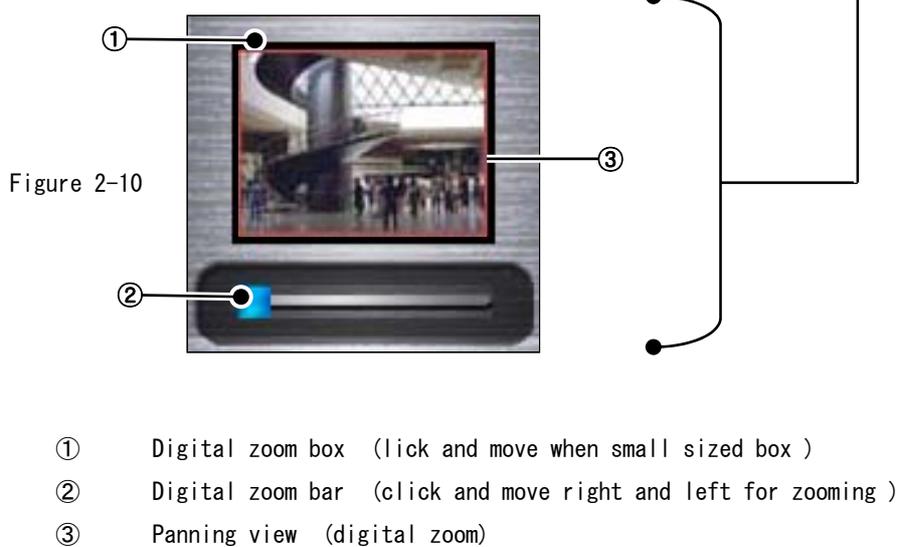

2.7 Panning View (Digital Zoom)

Digital zoom to zoom in a certain part of surveillance screen
 this function can be workable at single channel search

Figure 2-9

Zoom in panning view

1	Figure 2-8	①	Go to single channel search
2		③	Zoomed while zoom bar is slider to right and box is small
3	Figure 2-9 Figure 2-10		<div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>Panning View Screen Screen</p>  </div> <div style="text-align: center;"> <p>Display Screen</p>  </div> </div>

Moving panning view

1	Figure 2-8	①	Go to single channel search
2		③	Slide to right and click and move the small box
3	Figure 2-9 Figure 2-10		<div style="display: flex; justify-content: space-around;"> <div style="text-align: center;"> <p>Panning View Screen Screen</p>  </div> <div style="text-align: center;"> <p>Display Screen</p>  </div> </div>

2.8 Pan/Tilt

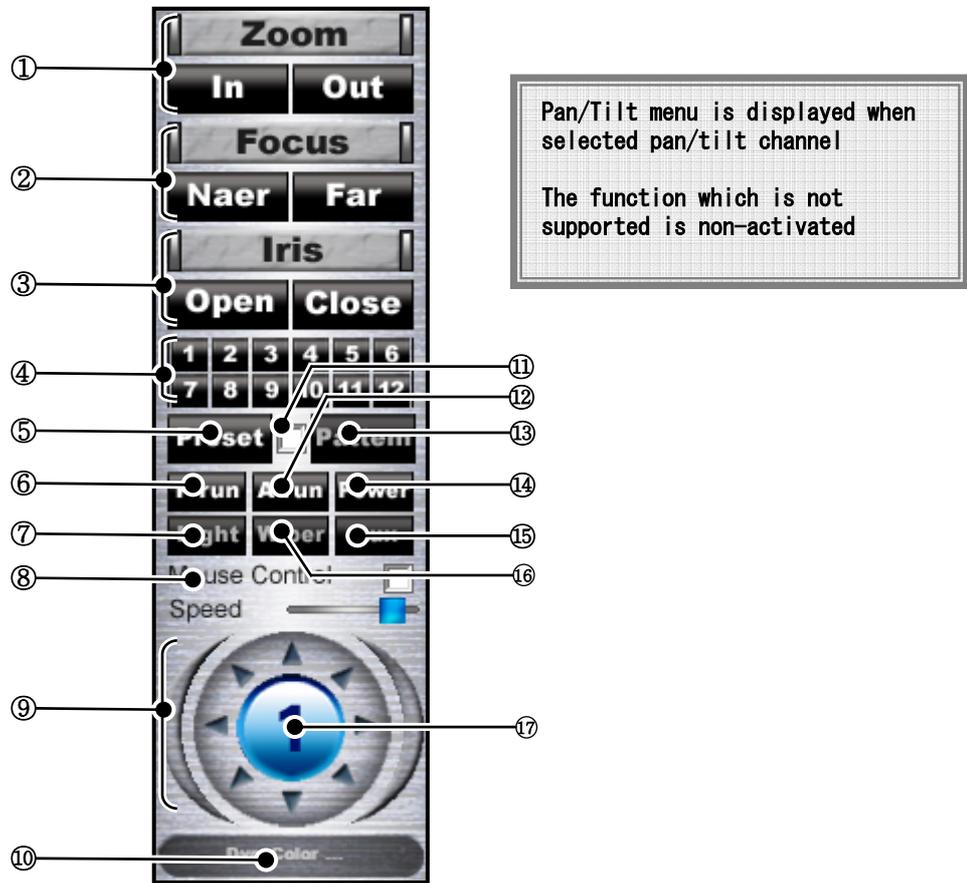

Figure 2-11

- ① Zoom (in/out)
- ② Focus (near/far)
- ③ Iris (open/close) - to open/close auto bright control
- ④ 1-12 - memory address of preset
- ⑤ Preset - to make preset
- ⑥ P-Run - to run the preset
- ⑦ Light - to turn on/off outside light
- ⑧ Mouse Control & Speed - to control PTZ with a mouse
- ⑨ To move the direction of the selected channel
- ⑩ The protocol of the selected channel

- ⑪ To save the preset
- ⑫ A-Run - auto moving to the position supported with the PTZ
- ⑬ Pattern - auto moving according to pattern set
- ⑭ Power - to turn on/off the camera power
- ⑮ Aux - to run the aux function of the PTZ
- ⑯ Wiper - to turn on/off the wiper
- ⑰ Showing the current channel

Setting preset and run

1	Figure 2-6		Select a channel
2	Figure 2-11	⑤	Select "Preset"
3		⑪	Check
4		⑨ ①	Move the camera desired direction Set zoom and/or focus
5		④	Save in a memory address (1-12)
6			Repeat 4 and 5 save the point location into a memory address
7		⑥	Run the preset by "P-run"

Deleting the preset

1	Figure 2-6		Select a channel
2	Figure 2-11	⑤	Select "Preset"
3		④	Click the preset memory address which to delete (1-12)

Setting pattern and run

1	Figure 2-6		Select a channel
2	Figure 2-11	⑬	Click on "Pattern" button
2		⑪	Check
3		⑨	Move the camera desired direction
		①	Set zoom and/or focus
4		⑪	Un-check
5		**	Auto moving by setting between check and un-check

Control pan/tilt with a mouse

1	Figure 2-6		Select a channel
2	Figure 2-11	⑧	Check "Mouse Control" Adjust "Speed"
3	Figure 2-6		Move the direction while clicking the mouse

Turn on external light

1	Figure 2-6		Select pan/tilt channel with external light
2	Figure 2-11	⑦	Click on "light" button

2.9 One Channel Search

One channel searching function while surveillance

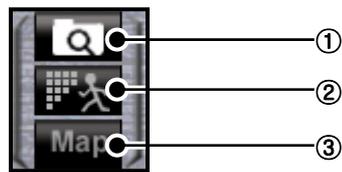

Figure 2-12

2.10 Back Up 

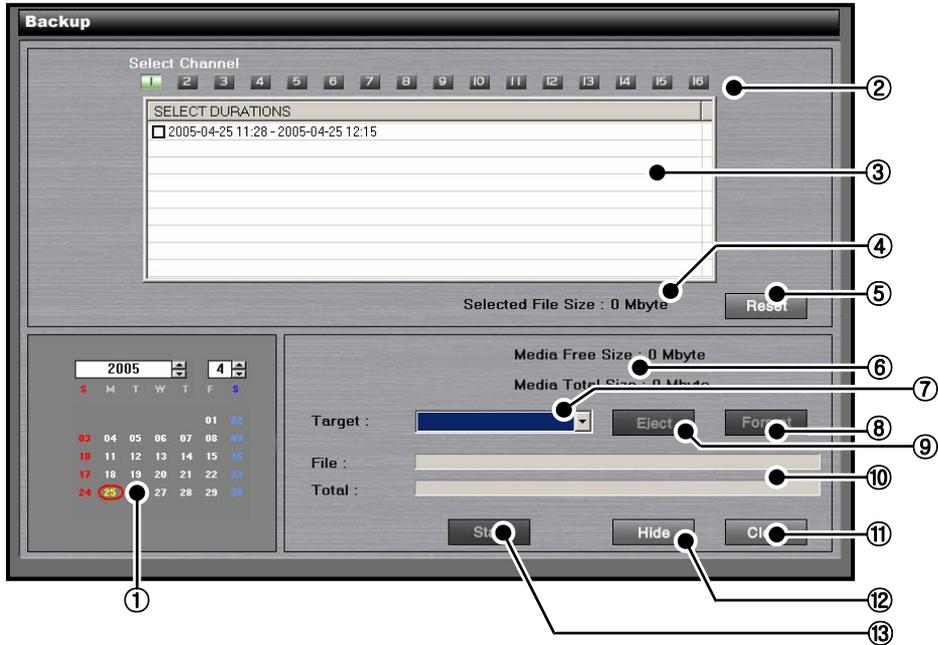

Figure 2-17

- ① Calendar - recorded date (select date for back up)
- ② Select the desired channel
- ③ Check back up data
- ④ Selected space - data size to back up
- ⑤ Reset - cancel the back up data selected
- ⑥ Free space - free space of media
- ⑦ Total space - total size for back up media
- ⑧ Format - format media
- ⑨ Eject
- ⑩ Status of back up process (file/total)
- ⑪ Close
- ⑫ Hide
- ⑬ Start/Stop

This function is used for back up the recorded data

You may connect external back up device or select back up at setup in case of HDD

* Recommended back devices

- HDD
- CD-RW (direct CD 5 3 above or InstantWrite install)
- DVD-RW (direct CD 5 3 above install)
- USB-memory HDD
- USB-HDD

You must format media first before using

Direct CD 5 3 above program is option item
CD-RW or DVD-RW can be worked only when direct CD 5 3 above program is
installed if you have trouble for this, please contact shop you bought in

CAUTION

Please back up periodically to avoid data damage

Media format

4. CONFIGURATION

- 4.1 Set up Menu
- 4.2 Camera/Sensor
- 4.3 Schedule
- 4.4 D/O Schedule
- 4.5 Communication
(network)
- 4.6 User/Permissions
(users)
- 4.7 Archive
(backup)
- 4.8 Save
- 4.9 Go to Shell
- 4.10 General Functions

4.1 Set up Menu

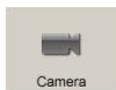

-  Camera - camera/audio/sensor set up
-  Schedule - record schedule set up
-  Sensor/Alarm - Sensor/Alarm set up
-  Communication - network
-  User/Permissions - user/permission set up
-  Archive - back up devices, network event set up
-  Save - save change
-  Go to shell
-  Exit - exit and go to surveillance mode

Figure 4-1

4.2 Camera/Sensor

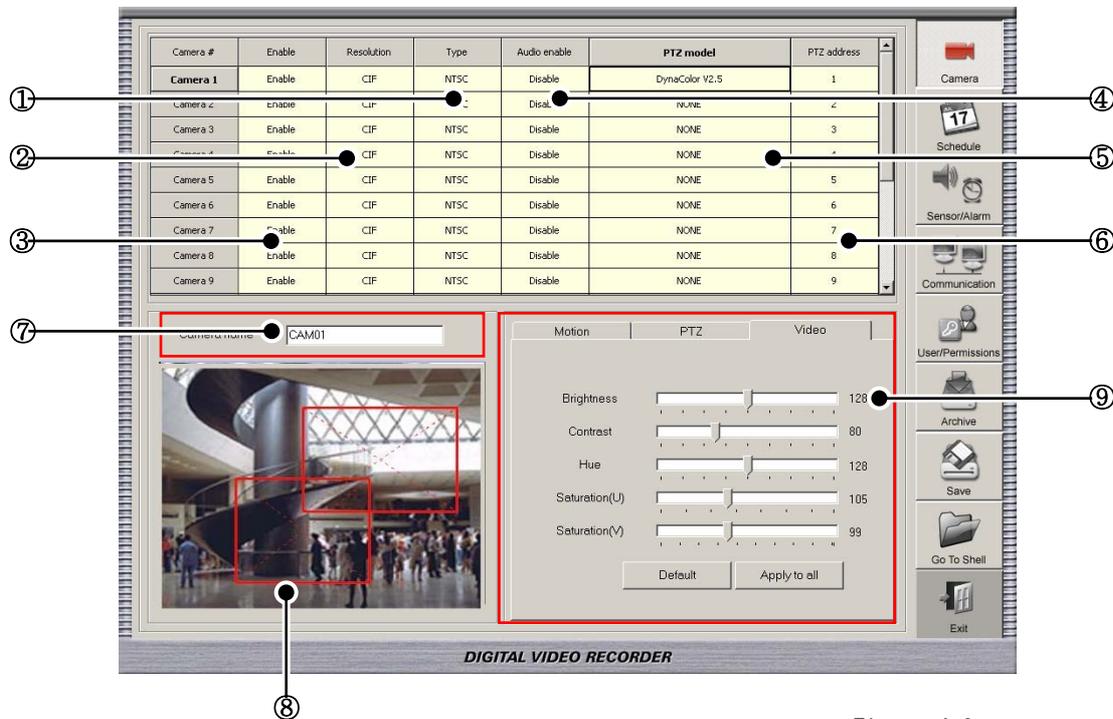

Figure 4-2

- ① Camera Type – select type (NTSC/PAL)
- ② Image size – select picture size. (CIF/HALF VGA/VGA)
- ③ Camera Enable – Check camera use.
- ④ Audio Enable – Check audio use.
- ⑤ PTZ Model – Select pan tilt of channel.
- ⑥ PTZ address – Select pan tilt address of channel.
- ⑦ Camera Name - change the camera name.
(you should be select channel)
- ⑧ Motion region – Setup motion region. (max 5 region)
- ⑨ Motion, PTZ, Video (color)
- Setup motion, PTZ, color of channel. .
(you should be select channel)

Channel select

- If you want to select channel, you must click the desired camera in yellow list box

4.2.1 Motion area

Select motion detect area of selected camera

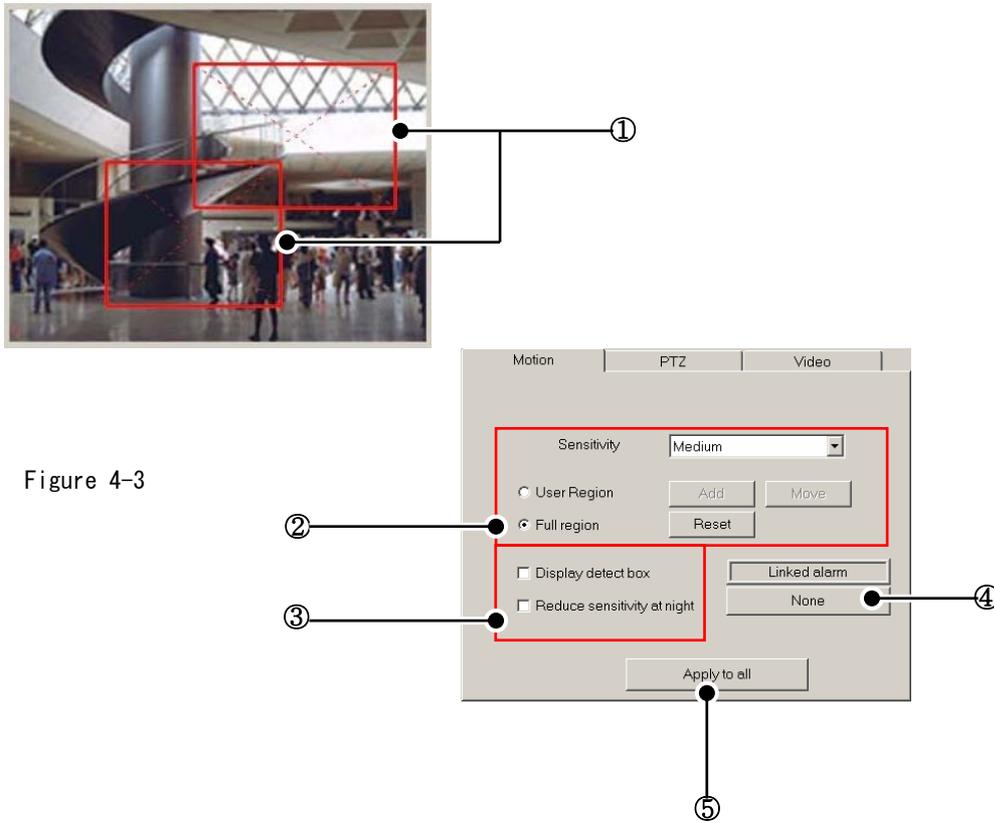

Figure 4-3

- ① User defined motion detect area
- ② User Defined - user define area
Full Region - full screen area
Add/Move - add user define area, move the area
Reset - delete user define area/ full area
Sensitivity - adjust the sensitivity
- ③ Display detect box - show or hide motion detected box
Reduce sensitivity at night
- reduce or not reduce motion sensitivity at night
- ④ Select Linked Alarm of channel.
- ⑤ Apply to all - apply to all cameras

4.2.2 PTZ

Adjust screen color and motion area

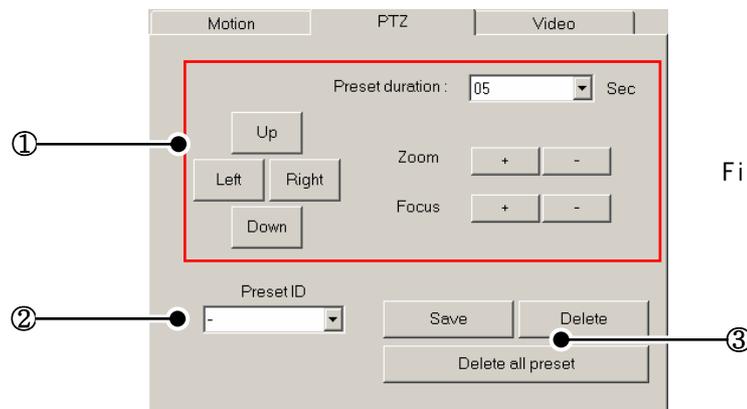

Figure 4-4

- ① Move camera as you want (up/down/right/left)
set zoom, focus, preset duration
- ② Preset ID - select preset ID
- ③ Save - save current preset setting
Delete - delete current preset
Delete all preset - clear all presets

4.2.3 Video

Setting preset when do is activated

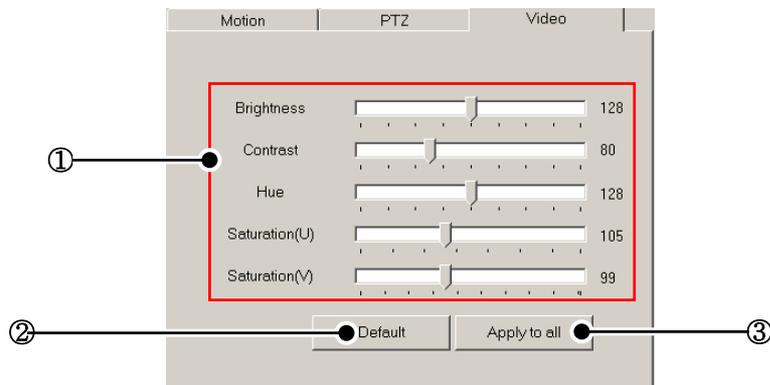

Figure 4-5

- ① Adjust Bright/Contrast/Hue/Saturation
- ② Set default value
- ③ Apply to all – apply to all cameras

4.3.1 Holiday setup

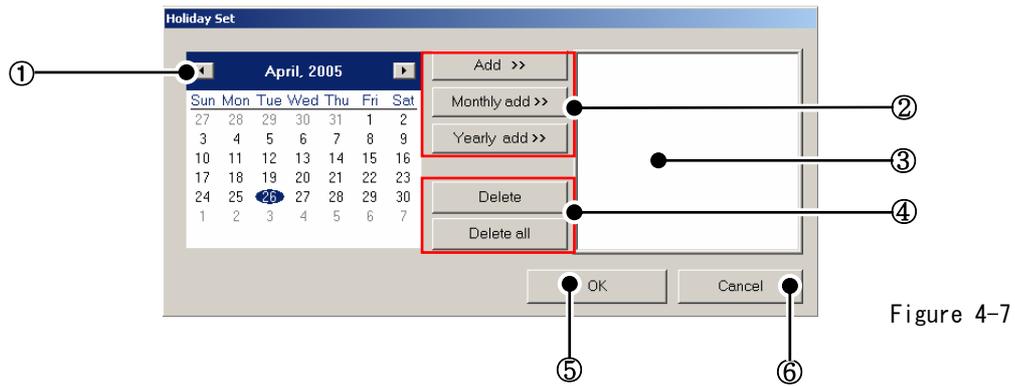

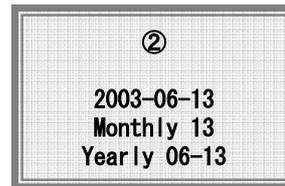

Figure 4-7

- ① Calendar - ◀ / ▶ previous/next month
- ② Add - add the date to holiday schedule (2003-06-13)
 Monthly Add - add monthly holiday (monthly 13)
 Yearly Add - add yearly holiday (yearly 06-13)
- ③ Added holiday lists
- ④ Delete - delete selected date from the list
 Delete All - delete all date from the list
- ⑤ Ok - save and exit
- ⑥ Cancel - exit without save

4.3.2 Schedule Group Setting

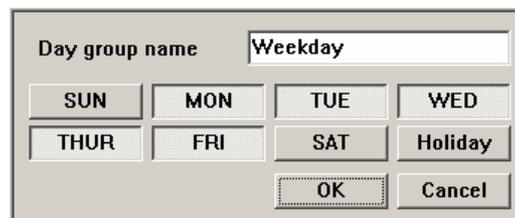

Figure 4-8

- ① Select days for the individual recording group
- ② Change the group name

4.3.3 Pre Duration Information

480FPS (Model 7016)			
Pre Duration FPS	Short Term	Middle Term	Long Term
Step 1 (MAX)	1 sec	2 sec	3 sec
Step 2	2 sec	4 sec	6 sec
Step 3	4 sec	8 sec	12 sec
Step 4	8 sec	16 sec	24 sec
Step 5	16 sec	32 sec	48 sec
Step 6 (MIN)	32 sec	64 sec	96 sec
240FPS (Model 6016)			
Pre Duration FPS	Short Term	Middle Term	Long Term
Step 1 (MAX)	2 sec	4 sec	6 sec
Step 2	4 sec	8 sec	12 sec
Step 3	8 sec	16 sec	24 sec
Step 4	16 sec	32 sec	48 sec
Step 5	32 sec	64 sec	96 sec
Step 6 (MIN)	64 sec	128 sec	192 sec

4.4 Sensor/Alarm

4.4.1 Sensor

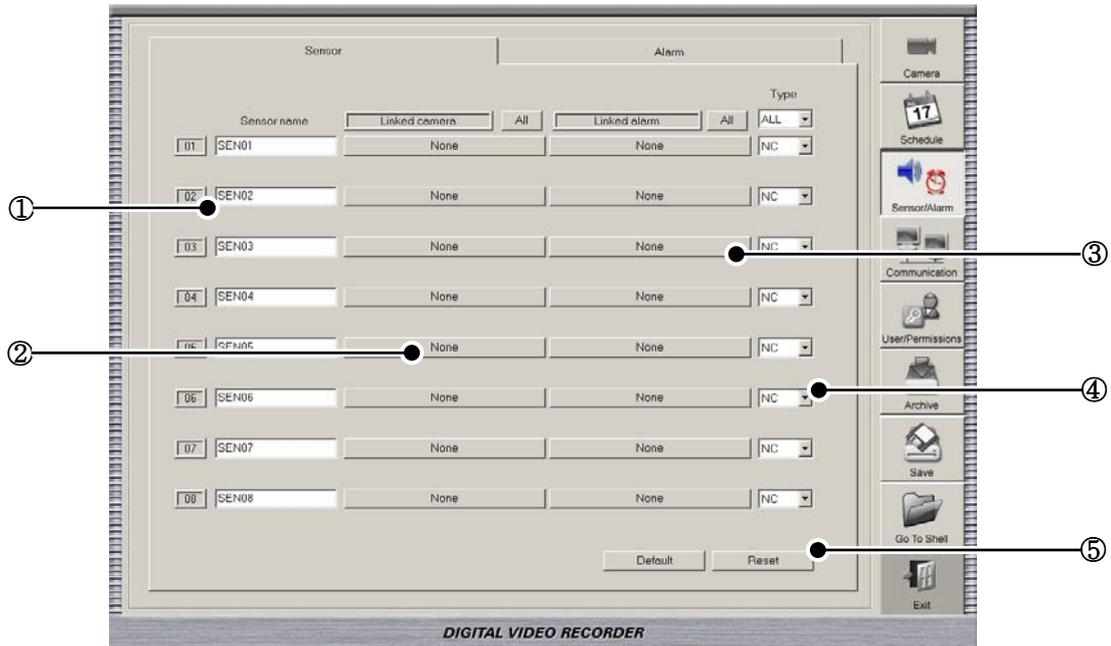

Figure 4-9

- ① Sensor Name - Change sensor name
- ② Linked Camera - Select Linked Camera
- ③ Linked Alarm - Select Linked Alarm
- ④ Sensor type - Select sensor type (Normal Close, Normal Open)
- ⑤ Default - Setting default value
- ⑥ Reset - Clear current value

4.4.2 Alarm

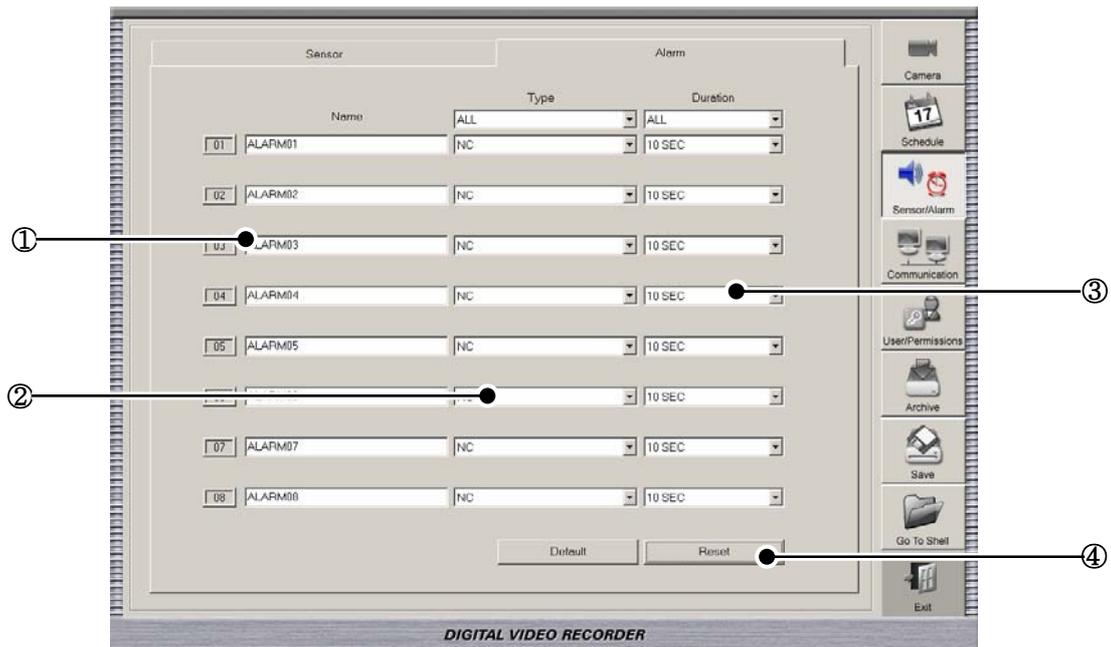

Figure 4-10

- ① Alarm Name - Change alarm name
- ② Alarm type - Select alarm type (Normal Close, Normal Open)
- ③ Alarm Duration - Select the duration for the ALARM.
(1 TIME, 1sec~10min, CONTINUE)
- ④ Default - Setting default value
- ⑤ Reset - Clear current value

4.5 Communication (Network)

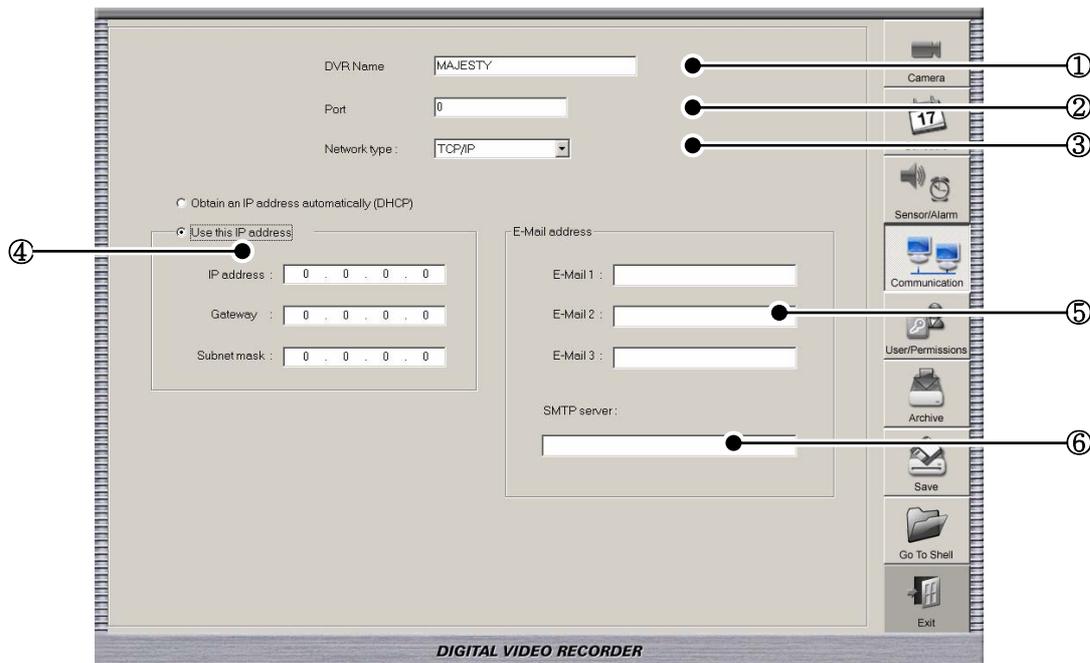

Figure 4-11

- ① DVR Name - Change DVR system name
- ② Port - Set network port
- ③ Network Type - Set network type (TCP/IP, Modem)
- ④ Set transmission (Enable/Disable)
- ⑤ Email List - type the e-mail address to receive the emergency transmission
- ⑥ SMTP Server - type SMTP server

Emergency transmission - detected picture by motion or sensor is sent to e-mail address

4.6 User/Permissions (users)

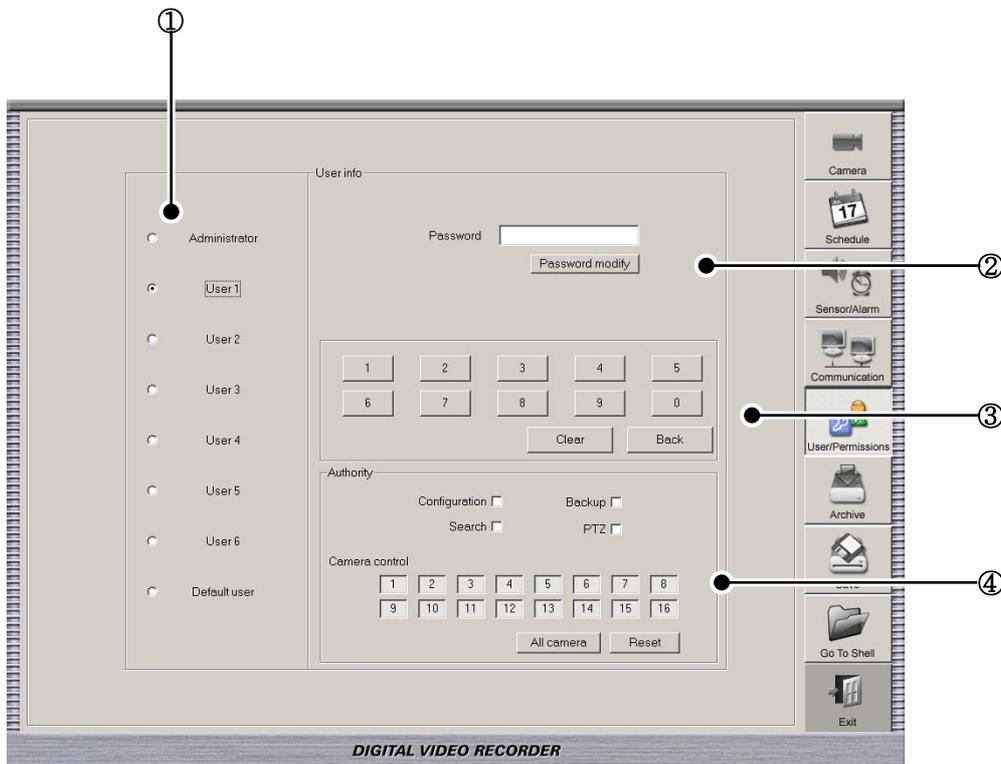

Figure 4-12

- ① User - Select the desired user
- ② Change password of administrator
- ③ password number key (0-9, clear, back)
- ④ Authority - set authority to each user (except Administrator)
(Configuration, Backup, Search, PTZ, Camera)

4.6.1 changing password of administrator

To change administrator password
Please periodically change password for security
Please keep password carefully

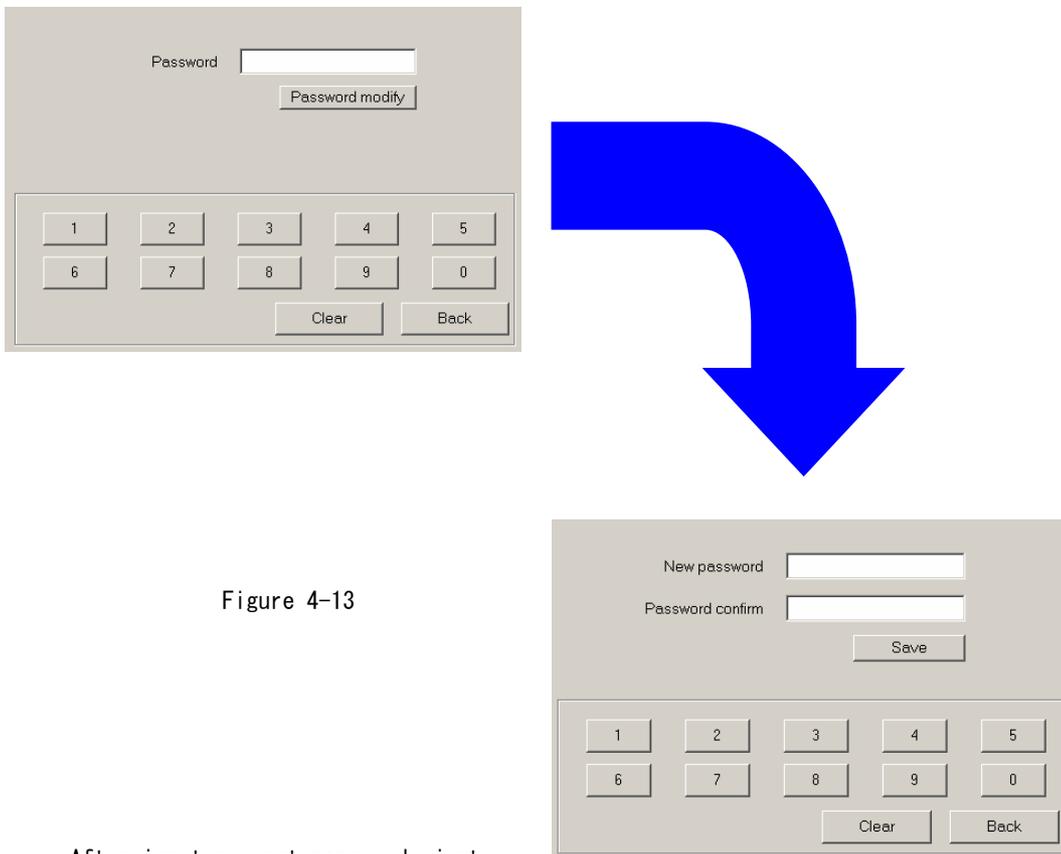

Figure 4-13

After input current password, just type new password and confirm

4.7 Archive (backup)

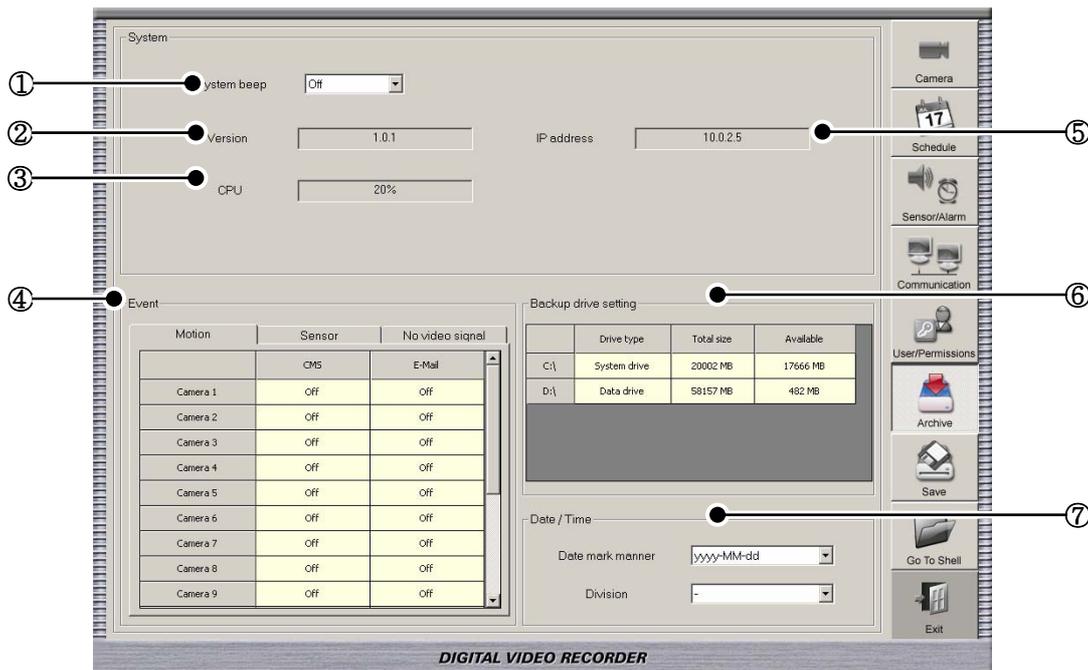

Figure 4-14

- ① System beep – In case of detecting system trouble by self diagnosis program, the beep sound can be controlled by switching ON/OFF.
- ② Version – show DVR version
- ③ CPU – show current CPU status
- ④ Event – Setup to send the message to the CMS or E-mail in case of an EVENT (Motion, Sensor, No video signal)
- ⑤ IP address – show IP address
- ⑥ Backup drive setting – toggle between data and backup drive
- ⑦ Date/Time - select type of date (yy/mm/dd, mm/dd/yy, dd/mm/yy) and select division(-, /)

If selected "backup drive", recording is not possible please make sure the purpose of the drive before setting

4.8 Save

To save the change

If not save, all change does not saved

If you want to change, be sure to save

4.9 Go to Shell

To go to windows mode

To reset or initialize when you add HDD

To install driver when some devices are attached

CAUTION

Do not run shell mode for long time
At shell mode, recording is not possible

4.9.1 Shell screen

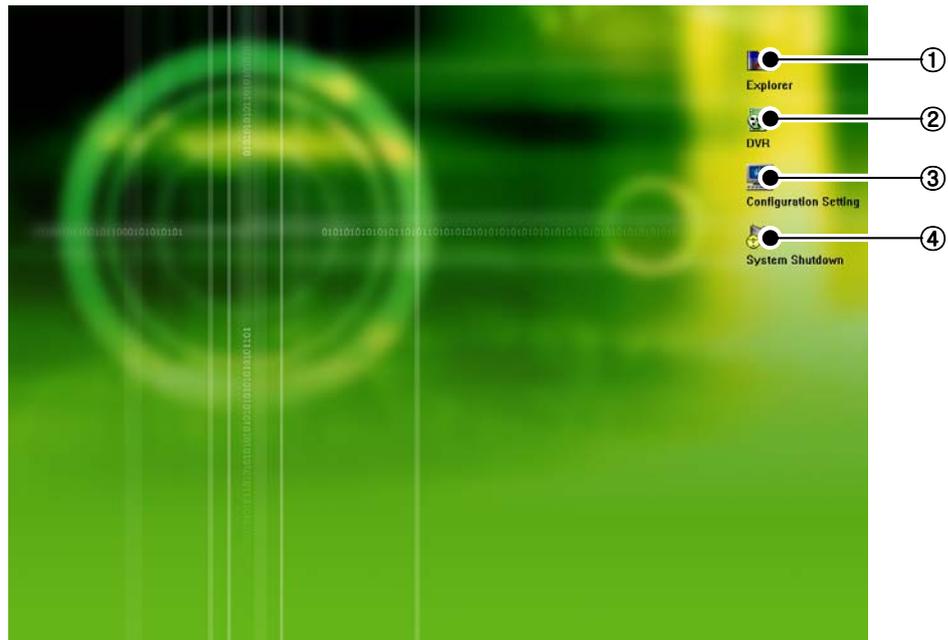

Figure 4-15

- ① Windows explorer
- ② Start DVR operation
- ③ The configuration setting
(set the icon name & color, date, network, printer)
- ④ System shut down

! CAUTION

Do not run shell mode for long time
At shell mode, recording is not possible

4.9.2 Configuration Setting

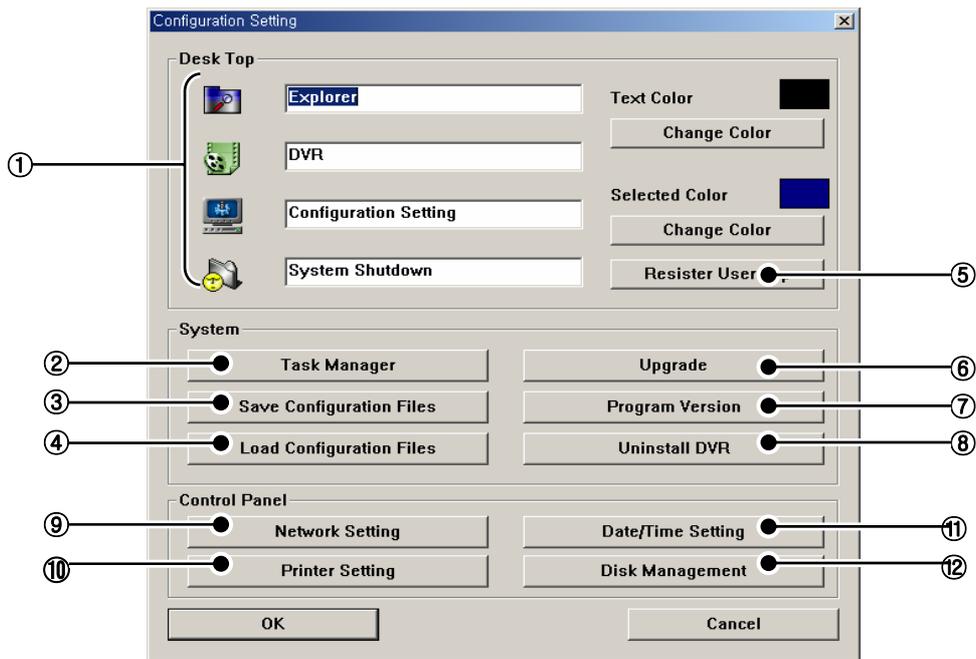

Figure 4-16

- ① Change the icon name of SHELL mode & text color
- ② Execute Windows Task Manager
- ③ Save configuration Files in DVR
- ④ Load configuration Files in DVR
- ⑤ This function is used in case of setup user program automatically except DVR
- ⑥ upgrade DVR system
- ⑦ Can figure out DVR version information
- ⑧ Delete DVR program (please do not use this function except Updating system)
- ⑨ Setup network information
- ⑩ Setup print
- ⑪ Show the registered information of Windows' date & time
- ⑫ Execute printer setup of Windows

4.10 General Functions

Change camera name

1	Figure 4-2	⑦	Selected camera Change camera name
---	------------	---	---------------------------------------

Check camera use

1	Figure 4-2		Check Camera Enable Select Image Size Setup PTZ Check Audio Enable Set motion detect region
---	------------	--	---

Set Sensor

1	Figure 4-9	①	Change sensor name
		②	Select linked camera
		④	Select sensor type

Alarm link

1	Figure 4-2		Select camera
	Figure 4-3	④	Select linked Alarm for motion
2	Figure 4-9	③	Select linked Alarm for sensor

Set motion area (full area)

1	Figure 4-2		Select camera
2	Figure 4-3	②	Select "Full Region" Adjust sensitivity

Set motion area (user defined)

1	Figure 4-2		Select camera
2	Figure 4-3	②	Select "User Defined" Select "Add" Adjust sensitivity
3			① Set motion detect area

Set Preset

1	Figure 4-2		Select camera
2	Figure 4-4	②	Select preset
3			Set points with up/down/left/right and zoom
4			① Repeat and Set

Setting schedule group

1	Figure 4-6	⑥	Select the desired group
2	Figure 4-8		Select days
3			Change group name

Normal record

1	Figure 4-6		Select camera
2		⑤	Select Normal
3		⑥	Setting schedule group or
		⑧	Select All day button
4		⑦	Set schedule with a mouse

Motion record for all camera

1	Figure 4-6		Select camera
2		⑤	Select Motion
3		⑧	Select All cam button
4		⑥	Setting schedule group or
		⑧	Select All day button
5		⑦	Set schedule with a mouse

Site name/ auto IP (DHCP)

1	Figure 4-11	①	Type DVR server name
2		④	Check "Obtain an IP address automatically (DHCP)"

Set IP address

1	Figure 4-11	②	Uncheck "Obtain an IP address automatically (DHCP)"
2		④	Type "IP Address" Type "Subnet Mask" Type "Gateway"

Emergency video transmission (motion detect)

1	Figure 4-11	⑤	Input email address (max 3)
2		⑥	Input SMTP server IP
3	Figure 4-14	④	Select motion tap Set on for the desired camera

Change administrator password

1	Figure 4-12	①	Select administrator
2		②	Confirm password
3	Figure 4-13		Input new password

5. Q & A

5.1 Power Problem

5.2 Screen Problem

5.3 Image Problem

5.4 PTZ Problem

5.5 Recording Problem

5.6 Network Problem

5.7 Print Problem

S

5.1 Power Problem

 Failure of DVR power

-  1. Check that the power cable is connected correctly
2. Check that voltage switch (115/230) is selected correctly
3. Check the multi tab power switch on

5.2 Screen Problem

 Screen does not appear

-  1. Check the connection between DVR and monitor
2. Check the monitor power is on
3. Check the brightness of monitor

 The initial screen does not appear even though the monitor screen is on

-  1. If not connected mouse and keyboard, it maybe happen the above problem please connect well the mouse and keyboard

5.3 image Problem

 The camera image does not appear

-  1. Check that video cable is connected well with DVR
2. Check the camera power is on
3. At “Figure 4-2” please check camera “Enable”
4. Test other camera if camera is out of order

 Camera image is b & w or distorted

-  1. Please test other camera if the camera is out of order
2. At “Figure 4-2” check the camera type correctly

5.4 PTZ Problem

 Pan/Tilt does not operate

-  1. Check the connection between rs-485 converter and pan/tilt (please check how to connect pan/tilt correctly)
2. Please test other rx-485 converter if the converter is wrong

5.5 Recording Problem

Motion recording does not work

1. At “Figure 4-2” check motion detect area setting
2. At “Figure 4-7” check the motion record schedule
3. At “Figure 4-8” check holiday record setting

Sensor recording does not work

1. At “Figure 4-2” please check that the sensor record is marked
2. At “Figure 4-2” check the type of sensor and working correctly
3. At “Figure 4-7” check sensor record schedule is setup
4. At “Figure 4-8” and “Figure 5-11” check the holiday recording
5. At “Figure 4-10” check the sensor schedule is well setup
6. Check the type of sensor and it is working

5.6 Network Problem

 At remote, it does not connect with DVR

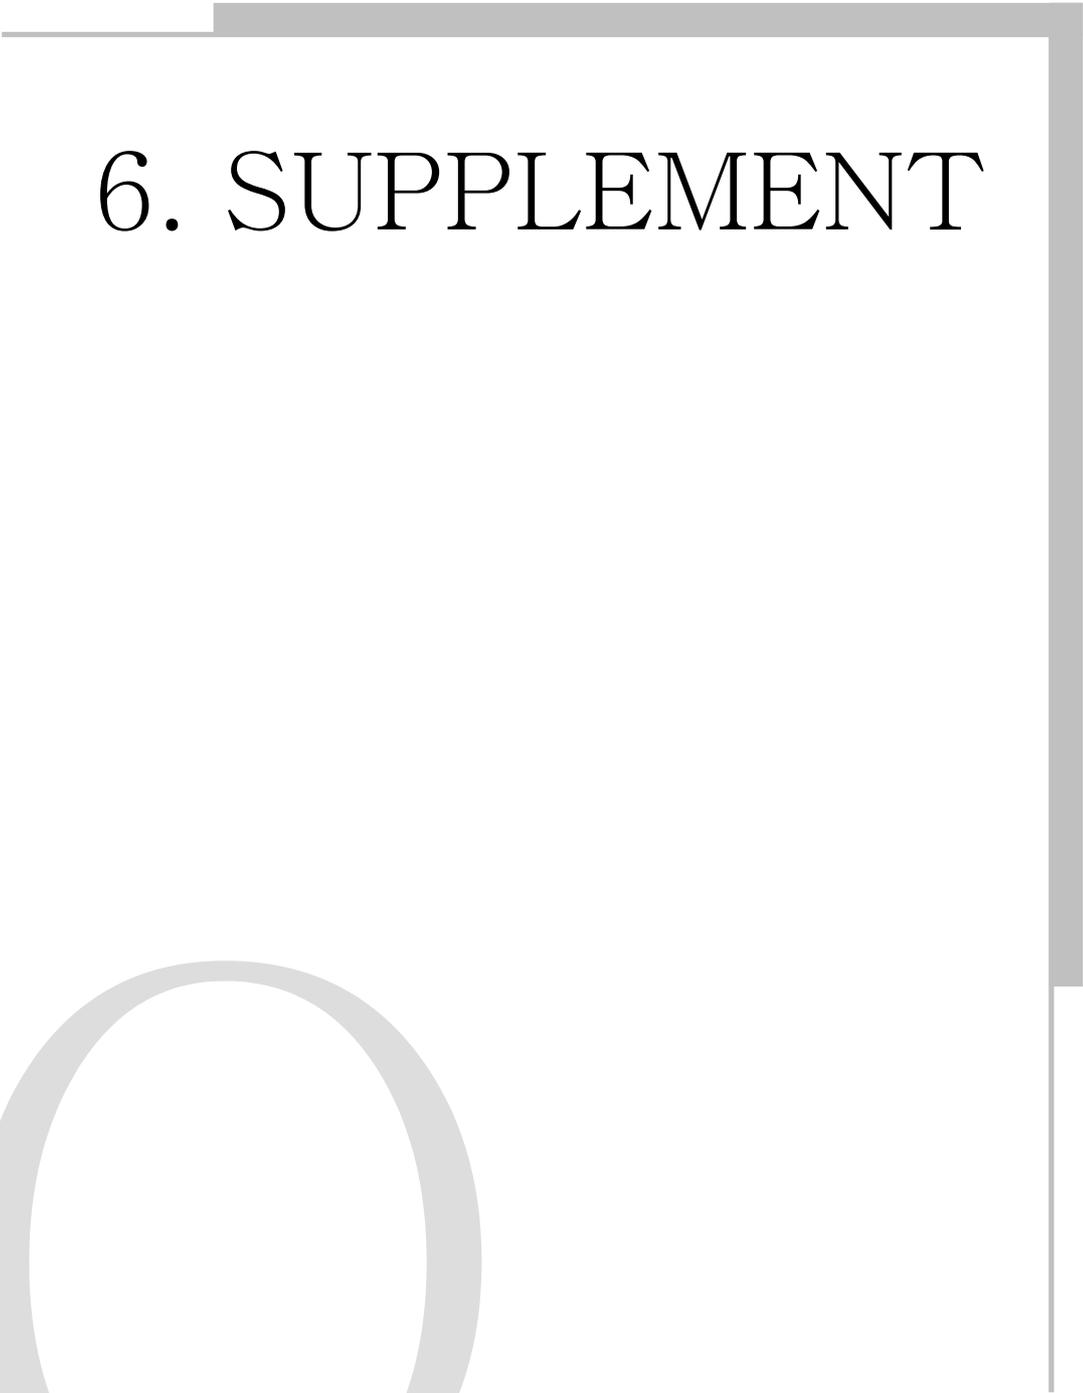

-  1. check the network cable is well connected
2. at "Figure 4-12" check "auto IP" marked or the address odd IP is correct

5.7 Print Problem

 It does not print

-  1. Check the print power is on
2. Check the cable between print and DVR
3. Please check the print driver is installed well (driver installation is done at shell mode)

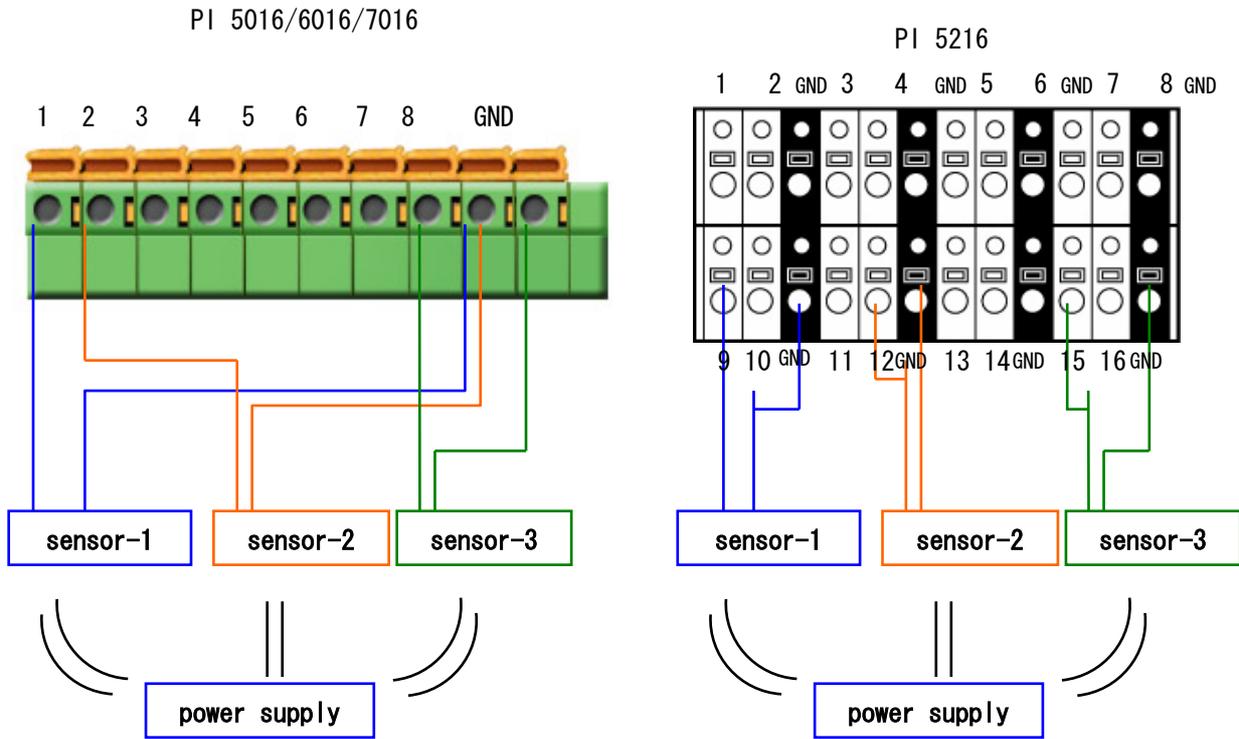

6. SUPPLEMENT

Sensor Connect

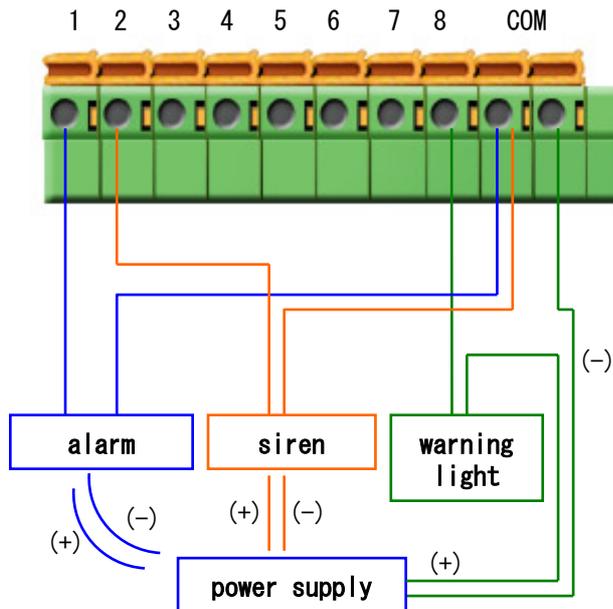

Connect one of the sensor cords to the main part's folding terminal and input another cord in any of the above number terminals

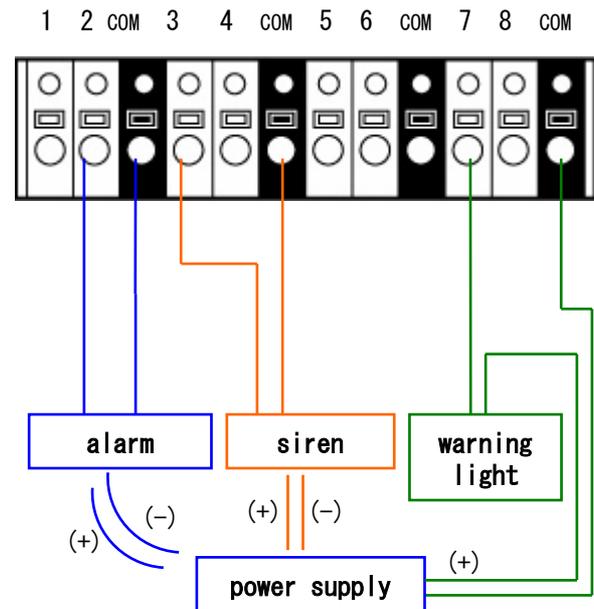

the sensor power is additionally supplied through additional power adaptor
 the sensor type of (normal close) and (normal open) are both worked well
 with our DVR
 you have to select the sensor type at (camera/sensor) screen

Digital Out Connect

PI 5016/6016/7016

PI 5216

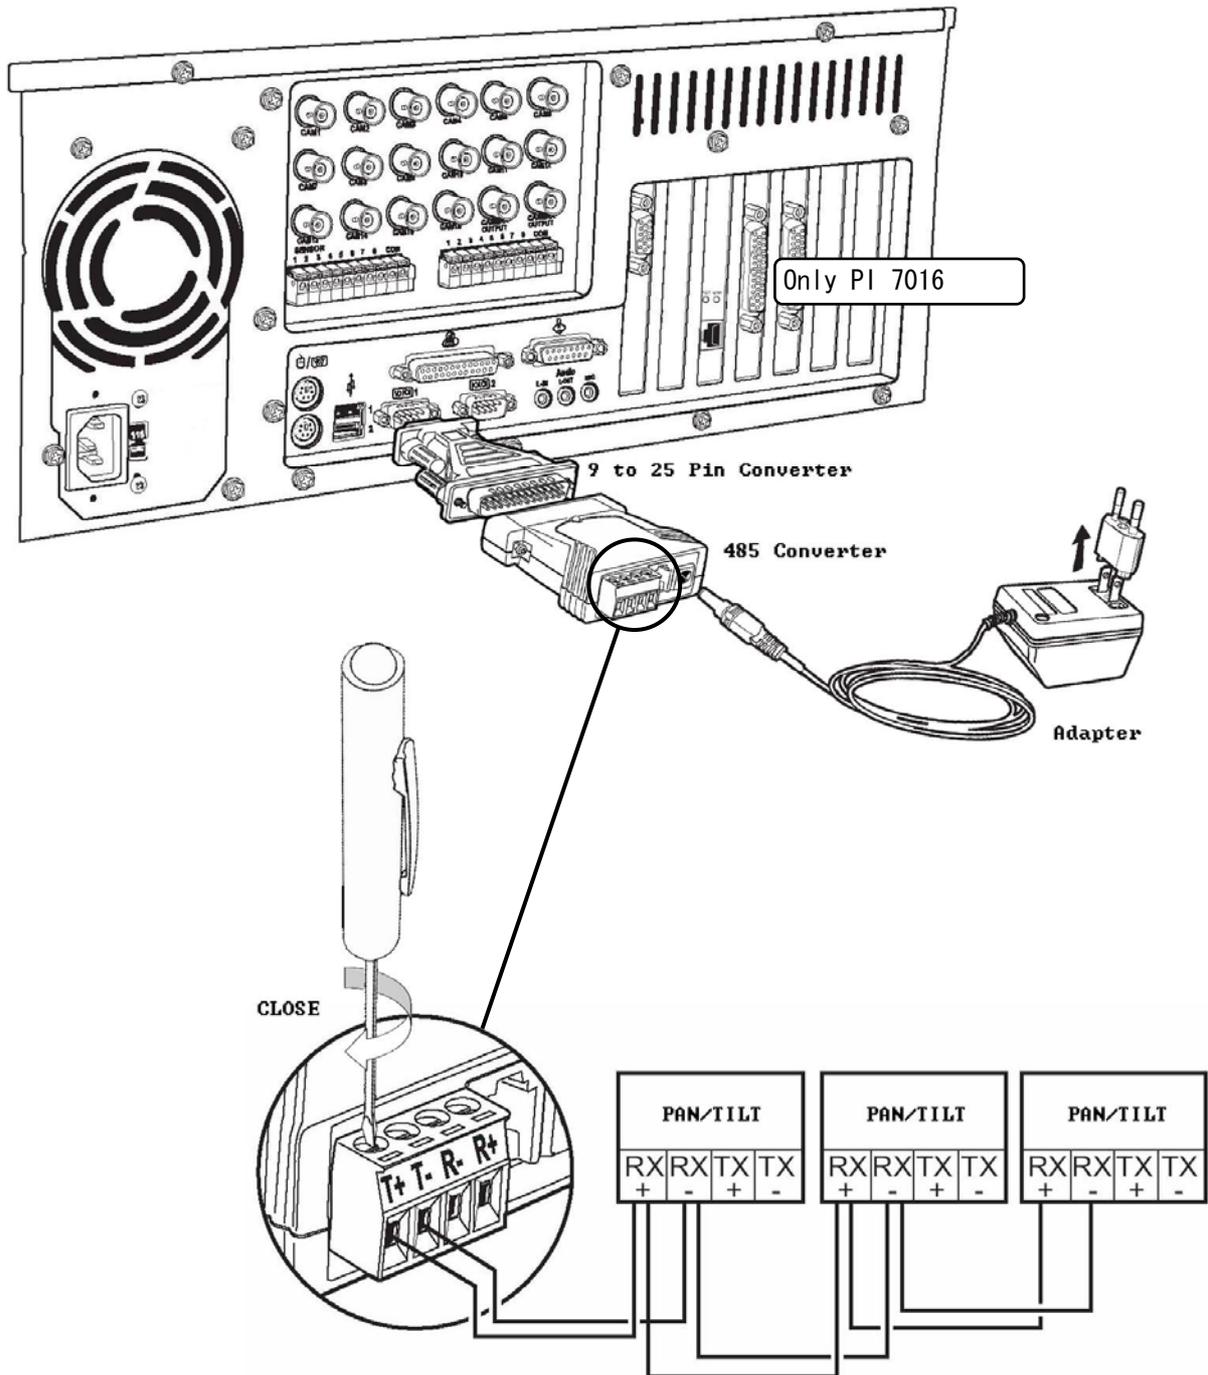

the D/O power is additionally supplied through additional power adaptor

the D/O type of (normal close) and (normal open) are both worked well with our DVR

you have to select the D/O type at (camera/sensor) screen

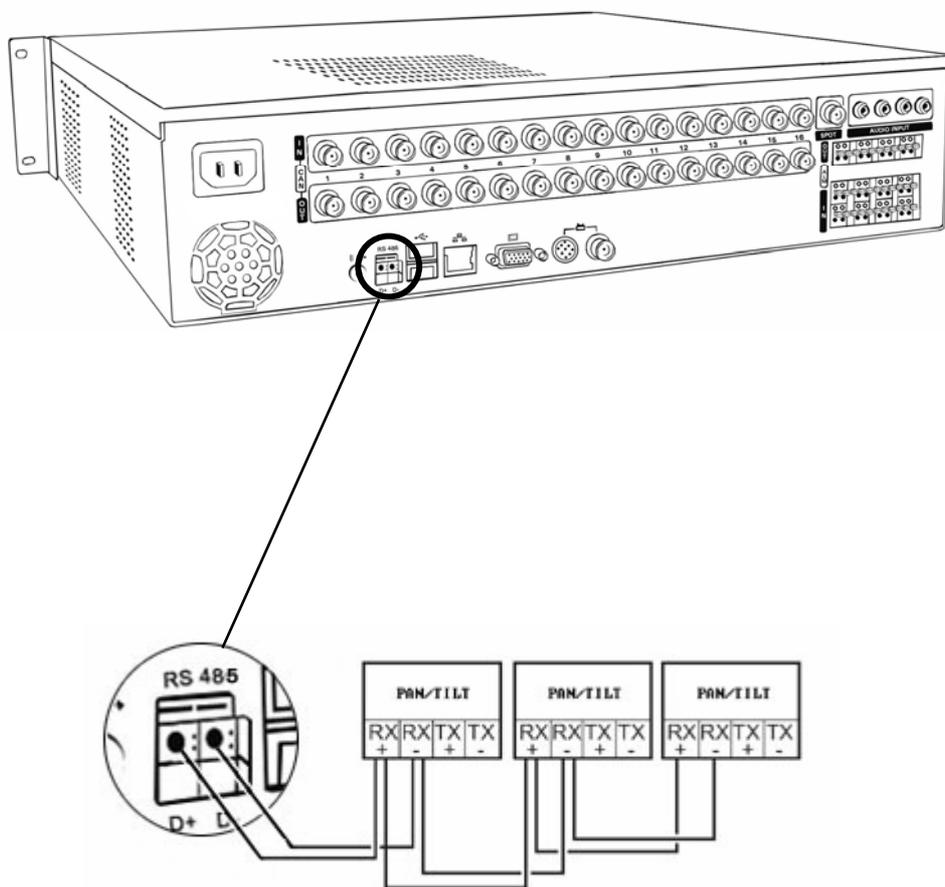

PAN/TILT Connect

Available Frame Setting A

PIDVR 5016/5216

- A. first channel' s available Frame : 30 frame
But CIF : 30, HALFVGA : 15, VGA : 8 frame because of CPU Full
- B. 2nd~16th channel' s available Frame :
 $120 \div (\text{Enabled channel count}) \div (\text{Camera resolution weight})$
- (ex.1) 4 cameras are enable only among 2~16 cameras and resolution is HALFVGA
 $120 \div 4 \div 2 = 15(\text{frame})$
So, we can set the frame each channels with 15 frame
- (ex.2) 1 cameras are enable only among 2~16 cameras and resolution is VGA
 $120 \div 1 \div 4 = 30(\text{frame})$
So, we can set the frame each channels with 30 frame
- (ex.3) 1 cameras are enable only among 2~16 cameras and resolution is CIF
 $120 \div 1 \div 1 = 120(\text{frame}) \rightarrow 7.5(\text{frame})$
If resolution is CIF then could not exceed 7.5frames($120 \div 16=7.5$)
So, we can set the frame each channels with 8 frame

** Terms are explained in next page

Available Frame Setting B

PIDVR 6016

A. 1st ~ 8th channel' s available Frame :
 $120 \div (\text{Enabled channel count}) \div (\text{Camera resolution weight})$

B. 9th ~ 16th channel' s available Frame :
 $120 \div (\text{Enabled channel count}) \div (\text{Camera resolution weight})$

(ex.1) 4 cameras are enable only among 1st ~ 8th cameras and resolution is HALFVGA
 2 cameras are enable only among 9th ~ 16th cameras and resolution is HALFVGA

1st ~ 8th : $120 \div 4 \div 2 = 15(\text{frame})$
 9th ~ 16th : $120 \div 2 \div 2 = 30(\text{frame})$

So, we can set the frame each channels with 15 frame among 1st ~ 8th and
 30 frame among 9th ~ 16th

(ex.1) 2 cameras are enable only among 1st ~ 8th cameras and resolution is CIF
 2 cameras are enable only among 9th ~ 16th cameras and resolution is CIF

1st ~ 8th : $120 \div 2 \div 1 = 60(\text{frame})$
 9th ~ 16th : $120 \div 2 \div 1 = 60(\text{frame})$

If resolution is CIF then could not exceed 15 frames($120 \div 8=7.5$)
 So, we can set the frame each channels with 15 frame among 1st ~ 8th and
 15 frame among 9th ~ 16th

[Terms]

A. CIF : 360x240 (NTSC), 360x288 (PAL)
 HALFVGA : 720x240 (NTSC), 720x288 (PAL)
 VGA : 720x480 (NTSC), 720x576 (PAL)

B. Camera resolution weight :

CIF : 1
 HALFVGA : 2
 VGA : 4

- HALFVGA is 2 times of CIF and VGA is 4 times of CIF

Available Frame Setting C

PIDVR 7016

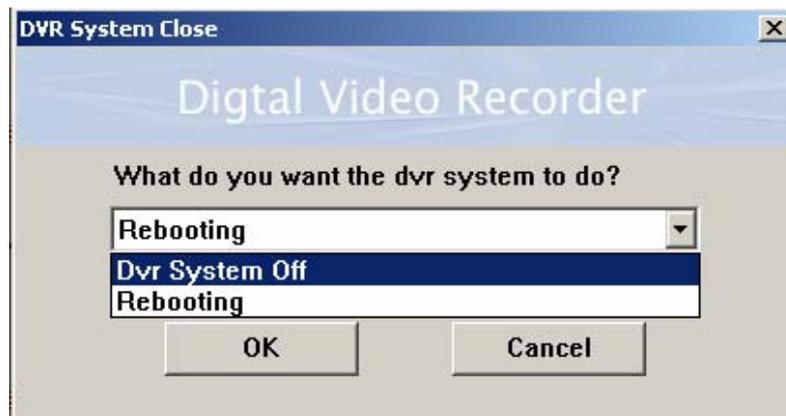

If camera resolution is 320x240 then we can set maximum 30 frames.

If camera resolution is 640x480 then we can set maximum 4 channels and max 15 frames

Smart Off Power

If user push the power button then dvr system pop up the login dialog box.

After logined with Administrator, User can select the System off or rebooting like below figure.

WARRANTY

MODEL	
SERIAL NO	
DATE OF PURCHASE	
WARRANTY PERIOD	ONE YEAR FROM DATE OF PURCHASE
PLACE OF PURCHASE	

- 1 The following warranty service applies to all factory defects that occur during normal use of this equipment
 - 1) Within One Month of Purchase: Free Repair, Replacement, Refund
 - 2) Within 3 Months of Purchase: Free Repair, Replacement
 - 3) After 3 Months to One Year : Free Repair

- 2 Warranty services are provided in accordance to the cause of damage as described below

Cause of Damage	Service	
	Within Warranty Period	After Warranty Period
Factory defect during normal use	Free Repair	Repair Service Charge Apply
User misuse, misapplication or accidents	Repair Service Charge Apply	
Unauthorized alterations and repair service		
Unavoidable situations such as fire and earthquake		
User abuse or tempering		
Natural wear of minor parts		

- 3 For any product related service, contact the office below

* This warranty certification is not duplicable Keep this certification in a safe place with the manual
