Safety Information

CAUTION

RISK OF ELECTRIC SHOCK.
DO NOT OPEN.

CAUTION:

TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK) NO USER SERVICEABLE PARTS INSIDE.   REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

Warning
This symbol indicates that dangerous voltage consisting a risk of electric shock is present within this unit.

Precaution
This exclamation point symbol is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING

To prevent damage which may result in fire or electric shock hazard, do not expose this appliance to rain or moisture.

WARNING

1. Be sure to use only the standard adapter that is specified in the specification sheet. Using any other adapter could cause fire, electrical shock, or damage to the product.

2. Incorrectly connecting the power supply or replacing battery may cause explosion, fire, electric shock, or damage to the product.

3. Do not connect multiple cameras to a single adapter. Exceeding the capacity may cause abnormal heat generation or fire.

4. Securely plug the power cord into the power receptacle. Insecure connection may cause fire.

5. When installing the camera, fasten it securely and firmly. A falling camera may cause personal injury.

6. Do not place conductive objects (e.g. screw drivers, coins, metal things, etc.) or containers filled with water on top of the camera. Doing so may cause personal injury due to fire, electric shock, or falling objects.

7. Do not install the unit in humid, dusty, or sooty locations. Doing so may cause fire or electric shock.

8. If any unusual smells or smoke come from the unit, stop using the product. In such case, immediately disconnect the power source and contact the service center. Continued use in such a condition may cause fire or electric shock.

9. If this product fails to operate normally, contact the nearest service center. Never disassemble or modify this product in any way.

10. When cleaning, do not spray water directly onto parts of the product. Doing so may cause fire or electric shock.

Precautions

Operating
• Before using, make sure power supply and others are properly connected.
• While operating, if any abnormal condition or malfunction is observed, stop using the camera immediately and then contact your Special dealer.

Handling
• Do not disassemble or tamper with parts inside the camera.
• Do not drop or subject the camera to shock and vibration as this can damage camera.
• Care must be taken when you clean the clear dome cover. Especially, scratch and dust will ruin your quality of camera.

Installation and Storage
• Do not install the camera in areas of extreme temperature, which exceed the allowable range.
• Avoid installing in humid or dusty places.
• Avoid installing in places where radiation is present.
• Avoid installing in places where there are strong magnetic fields and electric signals.
• Avoid installing in places where the camera would be subject to strong vibrations.
• Never expose the camera to rain and water.

Contents

1 | Product & Accessories

※ **Please check if all the camera and accessories are included in the package.**

❶ Main Body

Camera module, screws, terminal block slot and DIP switches are included.

❷ Surface Mount Bracket

- It is used when installing the camera right on to the ceiling.
- To install the camera with the surface mount bracket, the bracket needs to be separated from the main body, then needs to be re-assembled the bracket and the main body according to the order.

❸ Screw & Plastic Anchor

- Screws are used to fix the surface mount bracket to the ceiling.
- Plastic anchors are used to tighten the screws to the hole by inserting them into the holes in advance.

❹ Terminal Block

Power, video, communication and alarm input cables are connected through the terminal blocks.
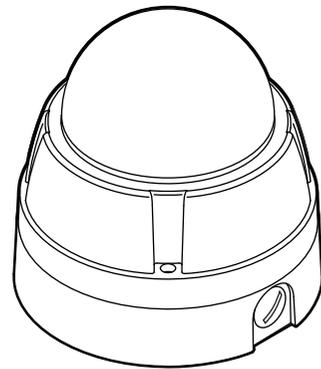

❺ Torx Screw Driver

It is used to screw/unscrew the fixed screws on the main body.

❻ Rubber Gasket

It is installed between the surface mount bracket and wall/wall mount bracket to prevent the water leakage.

❼ Manual

Please read the manual carefully before installing.

❶ Main Body + ❷ Surface Mount Bracket
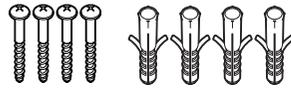

❸ Screw & Plastic Anchor-4pcs
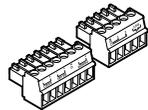

❹ Terminal Block x2: 5P+7P   ● Torx Screw Driver

User's Manual

❻ Rubber Gasket   ❼ Manual

❶ Dome Cover

❷ Lockup Screw

Main Body
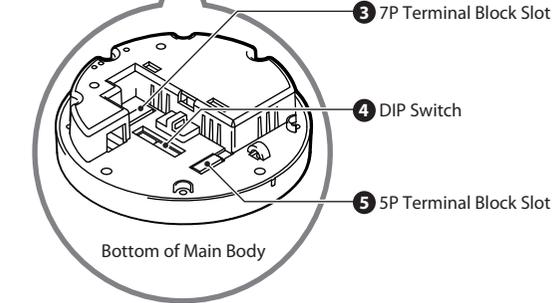

❸ 7P Terminal Block Slot

❹ DIP Switch

❺ 5P Terminal Block Slot

Bottom of Main Body
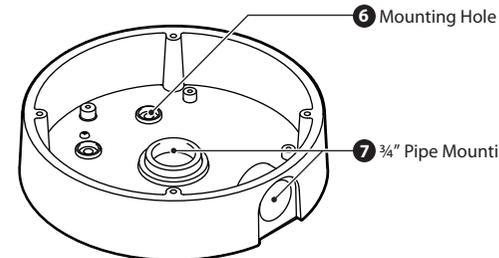

❻ Mounting Hole

❼ ¾" Pipe Mounting Hole

Surface Mount Bracket

❶ Dome Cover

- Protects the camera module from outside environment.
- Do not detach protection vinyl from the dome cover before finishing all installation processes to protect dome cover from scratches or dust.

❷ Lockup Screw

Fixes main body to the surface mount bracket.

❸ 7P Terminal Block Slot

- Power, keyboard controller/DVR video device are connected to this terminal block.
- Refer page 17 for details.

❹ DIP Switch

- Adjusts camera ID and protocols.
- Refer page 8, 9 for details.

❺ 5P Terminal Block Slot

- Alarm input and relay out cables are connected to this terminal block.
- Refer page 16 for details.

❻ Mounting Hole

This is used to attach the surface mount bracket to the ceiling.

❼ ¾" Pipe Mounting Hole

- This is used to pass the cables to the cameras.
- When water protection is needed, connect the ¾" pipe through this hole, then pass the cables through the pipe.

DIP Switch Setup

※ **Before installing the camera, you should set the DIP switch to configure the camera ID, communication protocol.**

Pin On/Off
If the pin is located 'ON' side of the printed label, it means on. In reverse, means off.

Pin On
Pin Off

Bottom of Main Body

DIP Switch for Communication

DIP Switch for Camera ID Setup
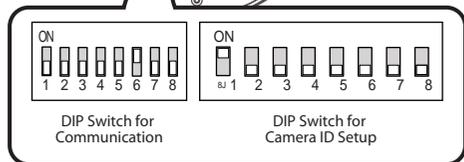

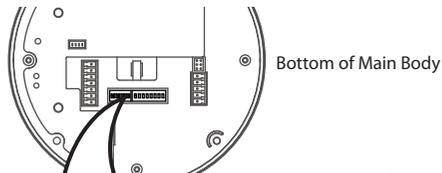

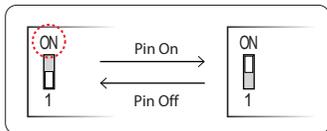

1. DIP Switch for Communication

- It is consist of communication protocol, baud rate and RS-485 termination setup pins.
- If you change the camera protocol by changing the DIP switch, the change will be effective after rebooting the camera.

Communication Protocol Setup Pin   Baud Rate Setup Pin   RS-485 Termination Setup Pin
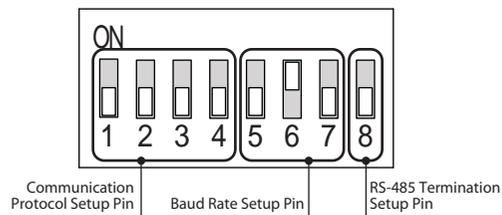

2. Communication Protocol Setup

- If you want to control using DVR or keyboard controller, their protocol must be identical to the camera's protocol. Otherwise, you cannot control the camera.
- The factory default is auto protocol.

❶ **Auto Protocol**
- If you set the protocol as auto protocol, camera will automatically recognize the kind of protocol.

Choose the appropriate communication protocol by setting the DIP switch.

❶ **Auto Protocol**

❷ **PELCO-D**
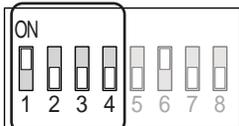

❸ **PELCO-P**

❹ **SAMSUNG**
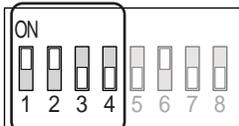

❺ **Panasonic**

❻ **GE**(Kalatel)

※ If there is other combination of pins from above, it will be recognize as auto protocol.

8

DIP Switch Setup

❼ **AD**(American Dynamics)
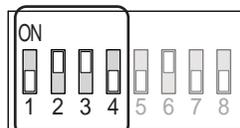

2. Communication Protocol Setup

Choose the appropriate baud rate protocol by setting the DIP switch
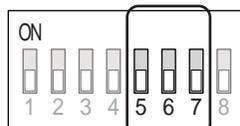

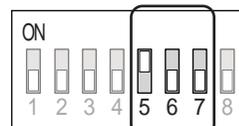

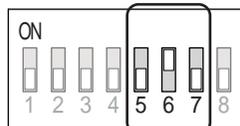

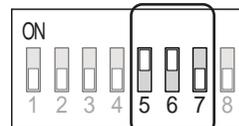

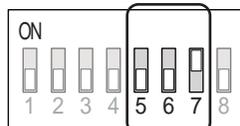

3. Baud Rate Setup
- Select the appropriate baud rate with DIP switch combination.
- The factory default is 9600BPS.

❶ **2400 BPS**

❷ **4800 BPS**

❸ **9600 BPS**

❹ **19200 BPS**

❺ **38400 BPS**

Choose the termination resistor on/off to notify the last camera.

❶ **Normal**

❷ **Last Camera**

4. RS-485 Termination Setup
- Pin 8 is use for on/off of RS-485 termination. Normally, it must be off state.
- Especially, when you have trouble with long daisy chain style connection, turn on this termination switch of the last camera.

Camera ID Setup

- ID number of camera is set using binary number. The example is shown below.

Pin	1	2	3	4	5	6	7	8
ID Value	1	2	4	8	16	32	64	128

5. DIP Switch for Camera ID Setup
- If you want to control a certain camera, you must match the camera ID with 'CAM ID, setting of DVR or keyboard controller.
- ID number of the camera is set using binary number.
- The range of ID is 0~255. Factory default of camera ID is 1.
- Camera ID will be effective without rebooting the camera.

9

2 | Installation Using Surface Mount Bracket

❶ Drilling the Hole on the Ceiling
To pass cables through the ceiling, drill a hole (30mm diameter) on the ceiling panel.

❷ Fix the Surface Mount Bracket
Pass the cables to the ¾" pipe hole, and screw the surface mount bracket to the ceiling.

※ Rubber Gasket
- Before installing the gasket, the hole in the center is to be cut by knife when only necessary.
- When installing gasket, the protrusion of the gasket should be matched with the groove joint of the bottom of the surface mount bracket.
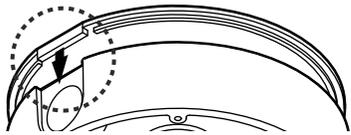

❸ Connect the Cables
- Connect wire cables to the terminal blocks.
- Refer page 16, 17 for details.

❹ Connect the Terminal Blocks
Connect the terminal blocks to the main body.
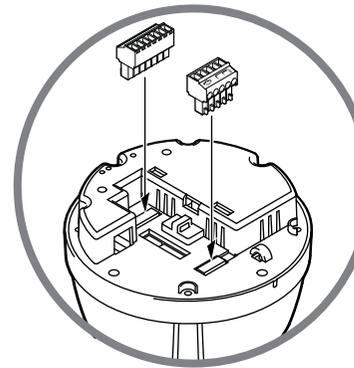

❺ Fix the Main Body
Screw the main body to the surface mount bracket by screwing 4 lock-up screws.

❻ Detach the Protection Vinyl
Detach the protection vinyl from the dome cover.

❶ Drilling the Hole on the Ceiling

※ Rubber Gasket

❷ Fix the Surface Mount Bracket

❸ Connect the Cables
❹ Connect the Terminal Blocks
❺ Fix the Main Body

❻ Detach the Protection Vinyl

Installation Using Flush Mount Ring Bracket (Option)

❶ Drilling the Hole on the Ceiling
To pass cables through the ceiling, drill a hole(70mm diameter) on the ceiling.

❷ Separate the Lock-up Screws from the Main Body
Separate the 4 lock-up screws from the main body in advance.
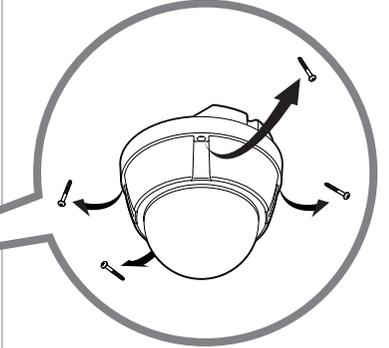

❸ Fix the Flush Mount Ring Bracket to the Main Body
Fix the flush mount ring bracket to the main body using torx screws.

❹ Connect Wire the Cables and Terminal Blocks
Connect wire cables to the terminal blocks. Refer page 16, 17 for details.

❺ Fix the Main Body
Screw the main body with the surface mount bracket to the ceiling using the screws on the surface mount bracket.

❻ Detach the Protection Vinyl
Detach the protection vinyl from the dome cover.

❶ Drilling the Hole on the Ceiling

❷ Separate the Lock-up Screws from the Main Body
❹ Wire the Cables and Terminal Blocks

❸ Fix the Flush Mount Ring Bracket to the Main Body

❺ Fix the Main Body

2
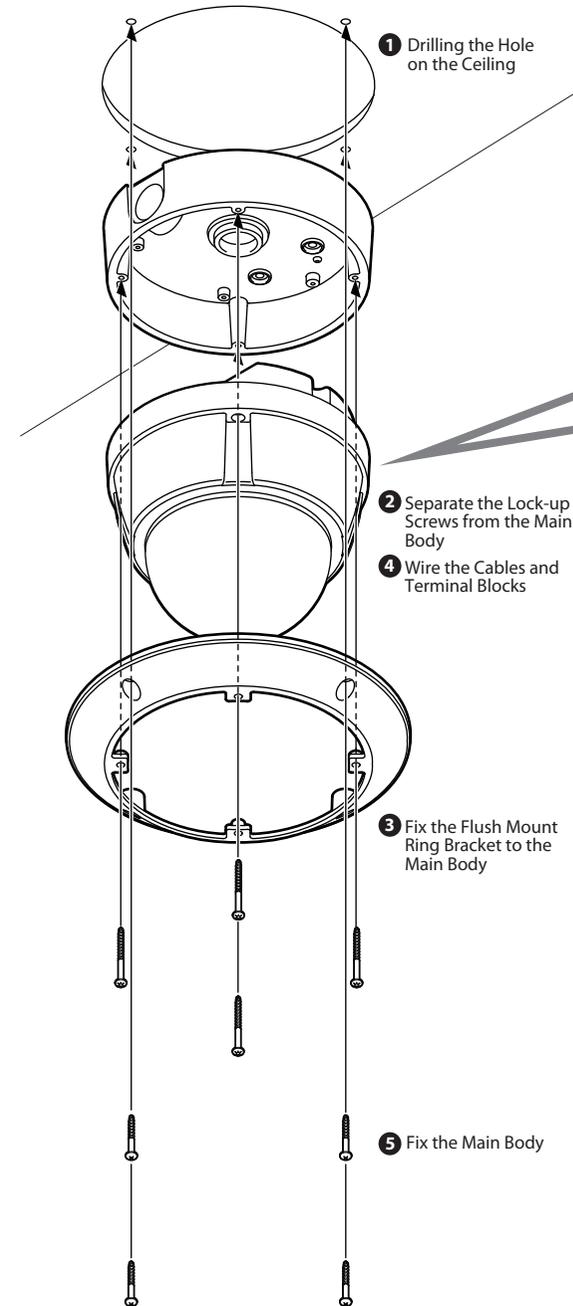

Installation Using Ceiling Mount Bracket (Option)

1. Installing on the Concrete Ceiling

❶ Drill the Ceiling and Fix the Anchor Bolts
On the ceiling, drill a hole (6mm diameter/ 50mm depth), and fix the anchor bolts.

❷ Fix the Ceiling Mount Bracket
1. Drill a hole (20mm diameter) on the pipe of the bracket to pass the cables.
2. On the fixed anchor bolts, attach the rubber gasket and screw the ceiling mount bracket.

2. Installing on the Wooden Ceiling

❶ Drill the Ceiling
To pass cables to upside of ceiling, drill a hole (30mm diameter) on the ceiling.

❷ Fix the Ceiling Mount Bracket
Pass the cables into the ceiling mount bracket, and screw the ceiling mount bracket to the ceiling.

❸ Fix the Surface Mount Bracket
Pass the cables through the hole of the surface mount bracket, screw the surface mount bracket to the ceiling mount bracket.

❹ Wire Cables
Wire the cables to the terminal block.
Refer page 16, 17.

❺ Connect the Terminal Blocks
Connect terminal block to the main body.
Refer page 10.

❻ Fix the Main Body
Screw the main body to the surface mount bracket.
(Screws are included in the main body.)

❼ Detach the Protection Vinyl
Detach the protection vinyl from the dome cover.

Rubber Gasket

❶ Drill the Ceiling and Fix the Anchor Bolts

❷ Fix the Ceiling Mount Bracket

❸ Fix the Surface Mount Bracket

Installation Using Wall Mount Bracket (Option)

❷ Fix the Wall Mount Bracket

Rubber Gasket

❶ Drill the Wall and Fix the Anchor Bolts

Rubber Gasket

❸ Fix the Surface Mount Bracket

❹ Wire Cables
❺ Connect the Terminal Blocks
❻ Fix the Main Body

❼ Detach the Protection Vinyl

1. Installing on the Concrete Wall

❶ Drill the Wall and Fix the Anchor Bolts
On the wall, drill a hole (6mm diameter/50mm depth), and fix the anchor bolts.

❷ Fix the Wall Mount Bracket
1. Drill a hole (20mm diameter) on the pipe of the bracket to pass the cables.
2. On the fixed anchor bolts, attach the rubber gasket and fix the wall mount bracket with nuts and screws.

2. Installing on the Wooden Wall

❶ Drill the Wall
To pass cables to the wall, make a hole about 30 mm on the wall.

❷ Fix the Wall Mount Bracket
Pass the cables into the wall mount bracket, and screw the wall mount bracket to the wall.

❸ Fix the Surface Mount Bracket
Pass the cables through the hole of the surface mount bracket, screw the surface mount bracket to the wall mount bracket.

❹ Wire Cables
Wire the cables to the terminal block.
Refer page 16, 17.

❺ Connect the Terminal Blocks
Connect terminal block to the main body.
Refer page 10.

❻ Fix the Main Body
Screw the main body to the surface mount bracket.
(Screw are included in the main body.)

❼ Detach the Protection Vinyl
Detach the protection vinyl from the dome cover.
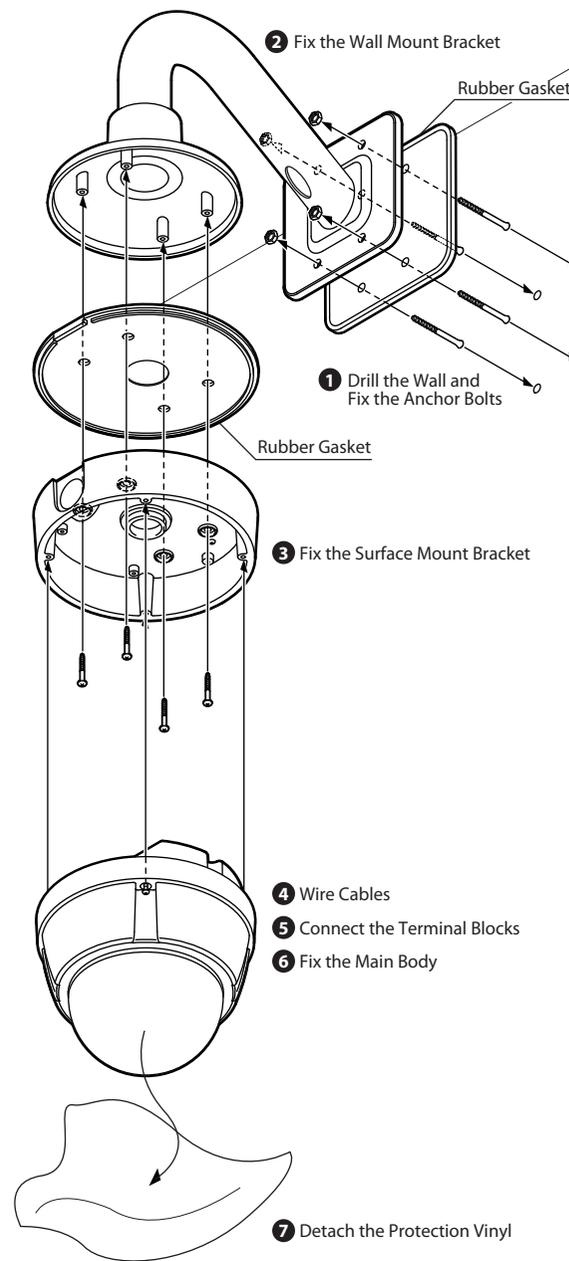

2 | Installation Using Wall Mount Bracket with Junction Box (Option)

❶ Drill the Wall to Fix the Anchor Bolts
On the wall, drill a hole (6mm diameter/50mm depth) for fix the anchor bolts.

❷ Pass Cables through the Wall Mount Bracket
Pass cables before fixing the wall mount bracket.

❸ Fix the Junction Box
Fix the junction box to anchor bolts on the wall.

❹ Close Junction Box Cover
Close cover to the junction box using the torx driver.

❺ Fix the Sun Shield Bracket
Fix the sun shield bracket to the wall mount bracket.
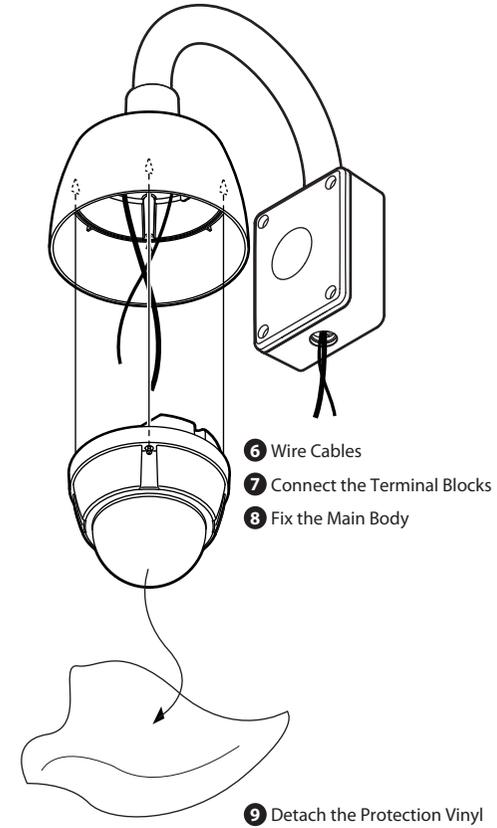

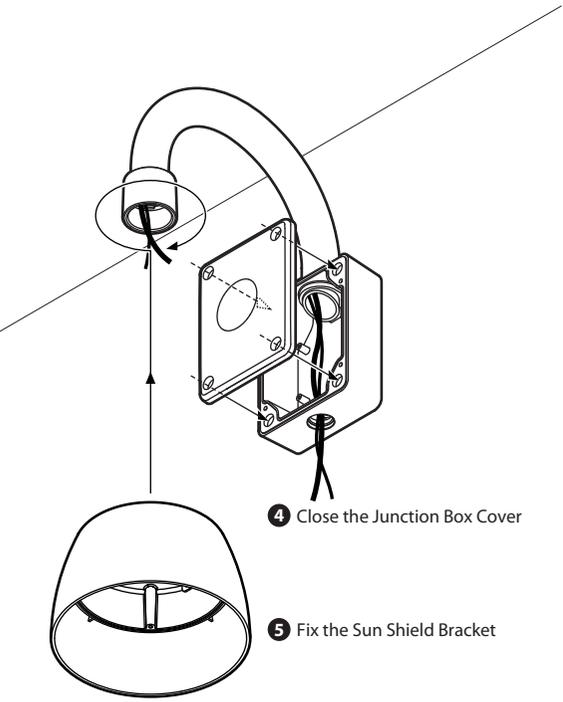

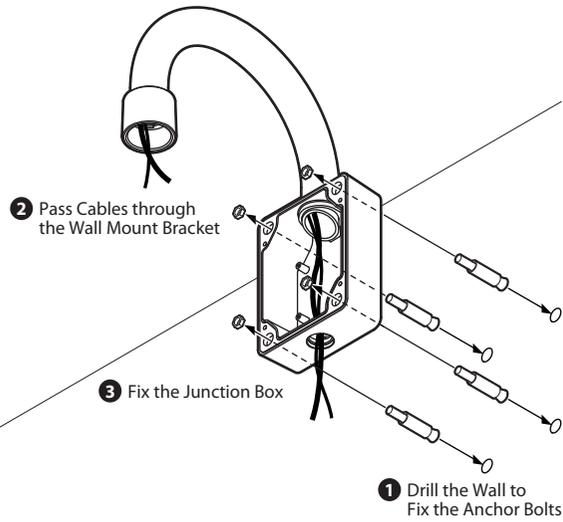

❷ Pass Cables through the Wall Mount Bracket

❸ Fix the Junction Box

❶ Drill the Wall to Fix the Anchor Bolts

❹ Close the Junction Box Cover

❺ Fix the Sun Shield Bracket

❻ Wire Cables
Wire the cables to the terminal block.
Refer page 16, 17.

❼ Connect the Terminal Blocks
Connect terminal blocks to the main body.
Refer page 10.

**❽ Fix the Main Body**
Screw the main body to the surface mount bracket.
(Screws are included in the main body.)

❾ Detach the Protection Vinyl
Detach the protection vinyl from the dome cover.

❻ Wire Cables
❼ Connect the Terminal Blocks
❽ Fix the Main Body

❾ Detach the Protection Vinyl

2 | Cabling the 5P Terminal Block

1 Relay Out

2 Sensor/Alarm Input
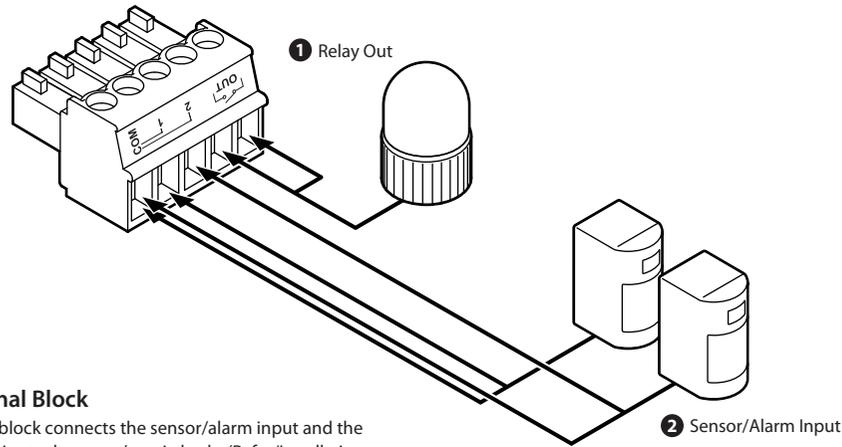

5P Terminal Block
5p terminal block connects the sensor/alarm input and the relay out device to the camer's main body. (Refer 'Installation Using Surface Mount Bracket' of page 10 for the connection of the terminal block.)

Relay Out Input Slot   Sensor/Alarm Input Slot

1 Relay Out
- It connects to the alarm lights, siren or lamps, and it is activated according to the OSD menu setting.
- If you want to use relay out, the types of sensor must be selected in OSD menu (ROOT MENU>SYSTEM SETUP> RELAY TYPE). The sensor types are normal open and normal close.

Normal Open (N.O)	Output voltage is high state when sensor is activated.
Normal Close (N.C)	Output voltage is high state when sensor is not activated.

<Inside of terminal block: Activation type of relay out N.O.>
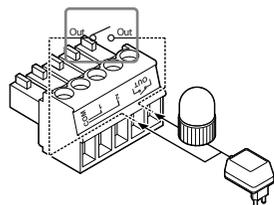

2 Sensor/Alarm Input
- It connects to IR sensor, IrDA sensor or door switch. If the sensor is activated, it can activate to move camera to the specific angle and to connect the alarm device.
- A cable of the sensor should connect to input 1 or 2, and the other should be connected to 'COM' slot.
- If you want to use alarm input, the types of sensor must be selected in OSD menu (ROOT MENU>MOTION SETUP> ALARM INPUT SETUP). The sensor types are normal open and normal close.

Normal Open (N.O)	Output voltage is high state when sensor is activated.
Normal Close (N.C)	Output voltage is high state when sensor is not activated.

<Inside of terminal block: Activation type of alarm input N.O. / N.C.>
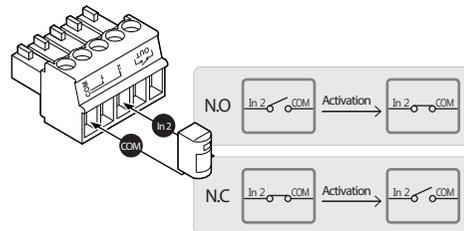

Cabling the 7P Terminal Block

BNC Video

1 Monitor

2 Keyboard Controller/DVR
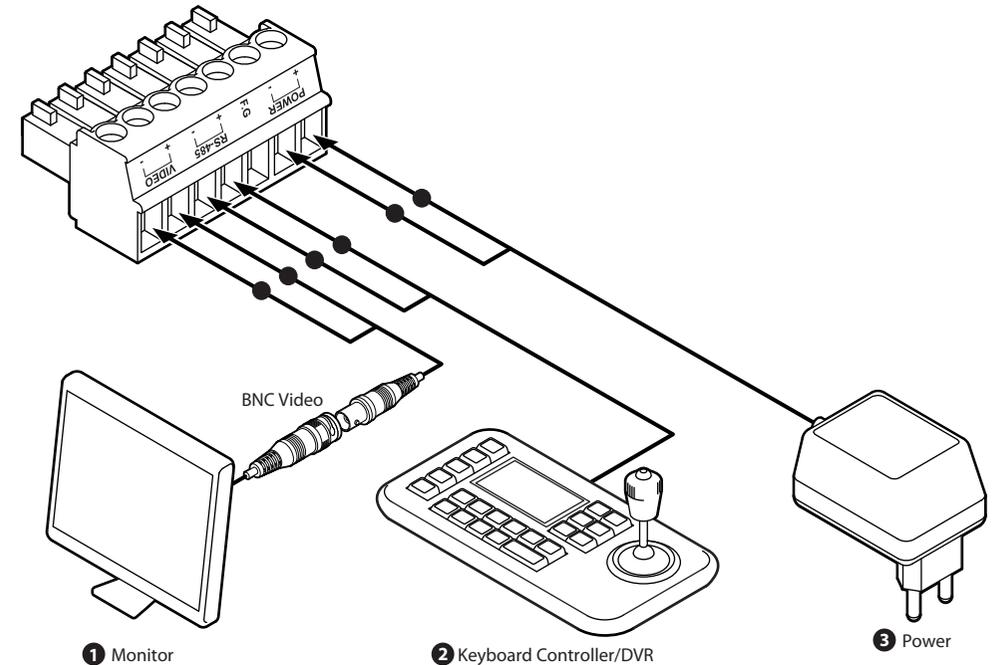

3 Power

7P Terminal Block
7p terminal block connects the power, keyboard controller/ DVR or video device and etc to the camera's main body. (Refer 'Installation Using Surface Mount Bracket' of page 10 for the connection of the terminal block.)

Power Input Slot   Video Input Slot

RS-485 Communication Input Slot
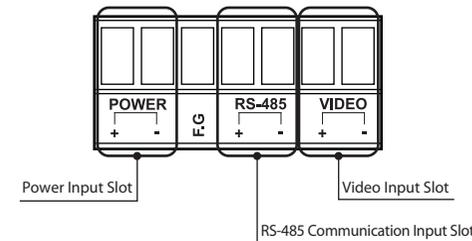

1 Monitor
Connects to video output device such as monitor using the BNC coaxial cable.

2 Keyboard Controller/DVR
Controls PTZ by connecting with keyboard controller or DVR using RS-485 communication standards.

Keyboard Controller/DVR

Camera 1   Camera 2   Camera n
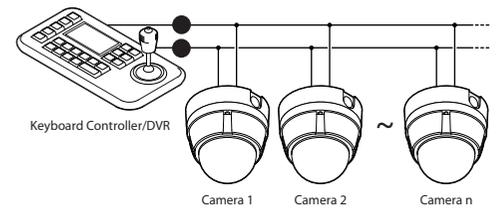

3 Power
- Please check the correct rated power.
- The rated power is marked on the bottom of the camera.

Power	Range	Power Consumption
DC 12V	DC 11V ~ 15V	8W

※ Fan/Heater model consumes 12W.

3

Check Points before Operation

❶ Preset and Pattern Function Pre-check

- Check how to operate preset and pattern function with keyboard controller/DVR in advance to operate camera function fully when using keyboard controller/DVR.

- If keyboard controller/DVR has no pattern key or function, use shortcut keys with preset numbers. For more information, refer to 'Reserved Preset' below.

❷ Reserved Preset

Some preset numbers are reserved to special functions.

Preset key + 95: Enters into OSD menu
Preset key + 131~134: Runs pattern function 1 ~ 4
Preset key + 141~148: Runs scan function 1 ~ 8
Preset key + 151~158: Runs group function 1 ~ 8
Preset key + 161: Sets relay output to OFF
Preset key + 161: Sets relay output to ON
Preset key + 165: Sets auto calibration to ON
Preset key + 166: Sets auto calibration to OFF
Preset key + 167: Zoom proportional jog ON
Preset key + 167: Zoom proportional jog OFF
Preset key + 170: Sets camera BLC mode to OFF
Preset key + 171: Sets camera BLC mode to HIGH
Preset key + 174: Sets camera focus mode to AUTO
Preset key + 175: Sets camera focus mode to MANUAL
Preset key + 176: Sets camera focus mode to SEMI-AUTO
Preset key + 177: Sets day & night mode to AUTO1
Preset key + 178: Sets day & night mode to NIGHT
Preset key + 179: Sets day & night mode to DAY
Preset key + 190: Sets OSD display mode to AUTO
    (Except privacy mask)
Preset key + 191: Sets OSD display mode to OFF
    (Except privacy mask)
Preset key + 192: Sets OSD display mode to ON
    (Except privacy mask)
Preset key + 193: Sets all privacy mask display to OFF
Preset key + 194: Sets all privacy mask display to ON
Preset key + 195: Sets fan/heater to ON
    (Turning off after 5 min, turn to auto mode)
Preset key + 196: Sets fan/heater to OFF
    (After turning off, turn to manual mode)
Preset key + 197: Fan ON(Turning off after 5 min, turn to auto mode)
Preset key + 198: Fan OFF(After turning off, turn to manual mode)
Preset key + 200: Sets digital zoom to ON
Preset key + 201: Sets digital zoom to OFF

❸ Auto Calibration

- If the camera is exposed the high temperature(over 50°) for a long time, the camera can lose focus. As a result, you will get a blurry image. In this case, enter 'Preset key + 165' to enable auto calibration.

- If auto calibration is enabled, the camera will be re-focused once every 6 hours. If you want to disable this function, enter 'Preset key + 165'.

Main Functions

❶ Preset

- Max. 127 positions can be stored as preset positions. The preset number can be assigned from 1 to 128, but 95 is reserved for starting OSD menu.

- Refer page 28 - 'ROOT MENU>FUNCTION SETUP>PRESET SETUP' for more detailed information.

1. Set Preset
Method 1) Use keyboard controller:
▦ Refer to keyboard controller manual.

Method 2) Use OSD menu.

2. Run Preset
Method 1) Use keyboard controller:
Preset key + Number key(1~128)

3. Delete Preset
To delete preset, use OSD menu.

❷ Scan

- By using scan function, you can make camera move between 2 preset positions repeatedly.

- Refer page 30 - 'ROOT MENU>FUNCTION SETUP>SCAN SETUP' for more detailed information.

1. Set Scan
To set scan, use OSD menu.

2. Run Scan
Method 1) If there is scan key on the keyboard controller:
Scan key + Scan number(1~8) + Enter key
Ex) Run scan 2 = Scan key + [2] + Enter key

Method 2) If there is no scan key on the keyboard controller:
Preset key + [Scan number(1~8) + 140]
Ex) Run scan 2 = Preset key + [142]

3. Delete Scan
To delete scan, use OSD menu.

❸ Pattern

- Pattern function is that a camera memorizes the path (mostly curve path) by joystick of controller for assigned time and revives the path exactly as it memorized.

- Refer page 31 - 'ROOT MENU>FUNCTION SETUP>PATTERN SETUP' for more detailed information.

1. Set Pattern
To set pattern, use OSD menu.

2. Run Pattern
Method 1) If there is pattern key on the keyboard controller:
Pattern key + Pattern number(1~4) + Enter key
Ex) Run pattern 2 = Pattern key + [2] + Enter key

Method 2) If there is no pattern key on the keyboard controller:
Preset key + [Pattern number(1~4) + 130]
Ex) Run pattern 2 = Preset key + [132]

3. Delete Pattern
To delete pattern, use OSD menu.

❹ Group

- The group function allows running sequence of presets, pattern and/or scans.

- Refer page 32 - 'ROOT MENU>FUNCTION SETUP>GROUP SETUP' for more detailed information.

1. Set Group
To set group, use OSD menu.

2. Run Group
Method 1) If there is group key on the keyboard controller:
Group key + Group number(1~8) + Enter key
Ex) Run group 2 = Group key + [2] + Enter key

Method 2) If there is no group key on the keyboard controller:
Preset key + [Group number(1~8) + 150]
Ex) Run group 2 = Preset key + [152]

3. Delete Group
To delete group, use OSD menu.

❺ Schedule

- The schedule function allows running an appropriate function like preset, scan, group, pattern, home move at the designated day and time.

- Refer Page 34 - 'ROOT MENU>FUNCTION SETUP>SCHEDULE SETUP' for more detailed information.

```
❶ Preset Label
- The label stored for specific preset.
- Refer page 29 for setting preset label.
  (ROOT MENU>FUNCTION SETUP>PRESET SETUP>LABEL)

❷ Date / Time
- Shows the current date/time.
- Refer page 38 for setting date/time.
  (ROOT MENU>SYSTEM SETUP>DATE/TIME SETUP)

❸ Image Flip
- Shows that images are currently reversed by auto flip function.
- Refer page 36 for setting image flip.
  (ROOM MENU>CAMERA SETUP>IMAGE FLIP)

❹ Camera ID
- The current camera ID.
- The camera ID is identical with the address of 'ROOT MENU>SYSTEM INFORMATION'.

❺ Action Title
Shows the current action titles of the camera.

Action Title	
SET PRESET 123	Means to store preset 123.
PRESET 123	Means it reached preset 123.
PATTERN 9	Means tthe camera is running pattern 9.
SCN 1/PRESET 123	Means the camera is running scan 1.
UNDEFINED	Means the action received is not defined.

❻ Temperature
- Current temperature: Boxed 'C' and 'F' means celsius and fahrenheit respectively.
- Refer page 25 for setting temperature unit.
  (ROOM MENU>DISPLAY SETUP>TEMPERATURE)

❼ Alarm Input Information
This information shows current state of alarm Input. If an input is on state it will show the number of input. If an input is off state, ' - ' will be displayed.

I:-2

Alarm 1 Slot of the Terminal Block   Alarm 2 Slot of the Terminal Block
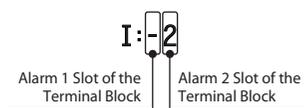

❽ Relay Out Information
This information shows the current state of relay out. If the output is on state it will show the number of output. If an output is off state, ' - ' will be displayed.

Relay Out On	Relay Out Off
0:1	0:-

❾ Compass Direction
- Shows the current compass direction of the camera.
- The direction is shown as N(North), S(South), E(East), W(West), NE(Northeast), NW(Northwest), SE(Southeast), SW(Southwest).
- Refer page 39 for setting compass direction.
  (ROOT MENU>SYSTEM SETUP>SET NORTH DIRECTION)

❿ Zoom Magnification
Shows the current zoom magnification.

⓫ Tilt Angle in Degree
Shows the current tilt(0-180) angle.

⓬ Pan Angle in Degree
Shows the current fan(0-359) angle.

❺ Move to the Previous Screen

※ This page explains how to operate the OSD menu using keyboard controller.

※ Read the manual of the keyboard controller.

※ If there are no keys or functions described below, refer the manual of the keyboard controller.

❶ Move the Cursor Up/Down to Choose Menu
To move from items to item in the menu, move the joystick Up/Down.

❷ Shift to the Sub Menu of the Chosen Menu
For all menu level, to go into sub menu, press near/enter key.

❸ Choose the Value
To change the value, press near/enter key to move the cursor to the value.

❹ Change the Value
Move the joystick Up/Down to change the value.

❺ Move to the Previous Screen
Press near key to save values and press far key to cancel values, then go to the previous screen.

ⓐ : The menu items surrounded with < > always have its sub menu. To move to the sub menu, press near/enter key.

ⓑ : This screen is the main menu of the ⓒ (DISPLAY SETUP).

ⓒ : This screen is the sub menu of 'DISPLAY SETUP' on the screen ⓑ.

ⓓ : ⓓ is the value of the each content.

❶ DISPLAY SETUP

This menu defines to enable/disable of OSD display on main screen.

CAMERA ID	ON / OFF
PTZ INFORMATION	ON / OFF / AUTO If an item is set to be 'AUTO', the item is displayed only when the value of it is changed.
ACTION TITLE	ON / OFF / AUTO
PRESET LABEL	ON / OFF / AUTO
ALARM I/O	ON / OFF / AUTO
DATE/TIME	ON / OFF
<PRIVACY ZONE>	Moves to the privacy zone setup.
TEMPERATURE	CELSIUS / FAHRENHEIT / OFF

❷ PRIVACY ZONE

- Selects area in image to mask.
- It selects the area to mask, and setup various function of the mask.

MASK NO.	1 ~ 4 Select mask number. If the selected mask has data already, camera moves as it was set. Otherwise, 'UNDEFINED' will be displayed under 'MASK NO.'.
DISPLAY	ON / OFF Sets if the camera makes mask shows or not on images.
CLEAR MASK	CANCEL / OK Deletes data in the selected mask no.
<EDIT MASK>	Moves to setup the mask no.

❸ EDIT MASK - Select Mask Location

1. Move camera to area to mask.
2. Adjust the mask size. Use the zoom key to adjust the image size.
3. Press near key to complete the location.

❹ EDIT MASK - Select Mask Color and Size

1. Choose the mask color using zoom key.
   (The current color is 50% transparent. When the mask setting is completed, the mask area is masked by 100% opaque color.)
2. Move joystick Left/Right to adjust the width.
3. Move joystick Up/Down to adjust the height.
4. Press near key to complete the setting.
5. If press far key, it returns to the previous setting without storing the setting.

❺ MASK SETTING - Completion Screen

- Run the mask no. marked on the screen.
- The value of 'DISPLAY' is set to 'ON' automatically.
- Can set mask 2 ~ 4 continuously.

▨ The objects behind the mask can be shown when the camera is moving in a short period.

▨ It is recommended that the size of the mask must be 20% bigger than the original target size so as to mask the objects during high speed pan/tilt.

OSD - MOTION SETUP

Key

2

```
PARKING ACTOIN SETUP
••••••••••••••••••••••
  PARK ENABLE      OFF
  WAIT TIME        00:10:00
  PARK ACTION      HOME

  BACK
  EXIT
```

1 MOTION SETUP

Setup the general functions of pan/tilt motions.

PRESET LOCK ON / OFF
If motion lock is set to on, it is impossible to set up and delete preset, scan, pattern and group. It is possible only to run those functions.
To set up and delete those functions, enter into OSD menu.

PWR UP ACTION ON / OFF
This function enables to resume the last action executed before power down. Most of actions such as preset, pattern, scan and group are available for this function but jog actions are not available to resume.

AUTO FLIP ON / OFF
In case that tilt angle arrives at the top of tilt orbit (90°), zoom module camera keep moving to opposite tilt direction (180°) to keep tracing targets. As soon as zoom module camera passes through the top of tilt direction(90°), images should be reversed automatically and 'F' appears in screen. If this function is set to 'OFF', tilt movement range is 0° ~ 90°

JOG MAX SPEED 2/SEC ~ 360/SEC
Sets maximum jog speed. Jog speed is inversely proportional to zoom magnification. As zoom magnification goes up, pan/tilt speed goes down.

JOG DIRECTION INVERSE / NORMAL
If you set this to 'INVERSE', the view in the screen is moving same direction with jog tilting. If 'NORMAL' is selected, the view in the screen is moving reversely.

FRZ IN PRESET ON / OFF
At start point of preset movement, camera starts freezing the image of start point. Camera keeps displaying the image of start point during preset movement and does not display the images which camera gets during preset movement. As soon as camera stops at preset end point, camera starts displaying live images which it gets at preset end point. This function availability should be different by models.

<PARKING ACTION SETUP>
Moves to 'PARKING ACTION SETUP' screen.

<ALARM INPUT SETUP>
Moves to 'ALARM INPUT ACTION' screen.

2 PARKING ACTION SETUP

If 'PARK ENABLE' is set to 'ON', camera runs assigned function automatically if there is no PTZ command during assigned 'WAIT TIME'.

PARK ENABLE ON / OFF
Enables/Disables 'PARKING ACTION'.

WAIT TIME 00:00:05 ~ 04:00:00
The time is displayed with "hh:mm:ss" format and you can change this by 1 sec unit.

1. To place the cursor on the time marked as below, press near key.
   00:10:00
2. Move joystick Left/Right to adjust hours, minutes and seconds.
3. Move joystick Up/Down to select the digit.
4. By pressing near key, save current setting.

PARKING ACTION HOME / PRESET 1~128 / SCAN 1~8 / PATTERN 1~4 / GROUP 1~8

Select the action of parking. Move joystick Up/Down to choose the appropriate action.

OSD - MOTION SETUP

2 ALARM INPUT SETUP

If an external sensor is activated, camera will move to corresponding action.

Alarm Type: N.O(Normal Open) / N.C(Normal Close)
- Sets sensor input type.
- Refer page 14 for more detailed information.

Alarm Action NOT USED / HOME / PRESET 1~128 / SCAN 1~8 / PATTERN 1~4 / GROUP 1~8
Assign counter-action to each alarm input. Among 149 actions, choose the action as explained below.

3 ALARM INPUT SETUP - Type Setup

1. Move joystick Up/Down to set alarm type.
2. Move joystick Left/Right to set alarm action.

4 5 ALARM INPUT SETUP - Alarm Action Setup

1. Move joystick Up/Down to set the action(HOME, PRESET, SCAN, PATTERN, GROUP) and no.
2. On screen 5, move joystick Left/Right to move the focus to set alarm type, function name and function no.
3. By pressing near key, save the current setting.

```

① **FUNCTION SETUP**

Configure 5 special functions with this menu.

<PRESET SETUP>
Moves to 'PRESET SETUP' screen.

<SCAN SETUP>
Moves to 'SCAN SETUP' screen. Refer page 30.

<PATTERN SETUP>
Moves to 'PATTERN SETUP' screen. Refer page 31.

<GROUP SETUP>
Moves to 'GROUP SETUP' screen. Refer page 32.

<SCHEDULE SETUP>
Moves to 'SCHEDULE SETUP' screen. Refer page 34.

② **PRESET SETUP - Undefined Screen**

127 presets from the number 1 to 128 can be assigned excluding preset 95 reserved for menu.

PRESET NO.   1 ~ 128 (Excluding 95)
If a selected preset is already defined, camera moves to pre-defined position and preset characteristics such as label and relay outputs show on monitor. (Refer screen 4) If a selected preset is not defined, "UNDEFINED" shows on monitor.

<EDIT SCENE>
Moves to 'EDIT SCENE' setup screen.

③ **EDIT SCENE**

1. Using joystick, move camera to desired position.
2. Using zoom key, move camera to desired screen size.
3. By pressing near key, the save current PTZ data

④ **PRESET SETUP**

If the preset is defined, the information will be shown on the OSD menu with the setting, and the alarm device (if defined) will be activated.

PRESET NO.   1 ~ 128 (Excluding 95)

<EDIT SCENE>

<LABEL>
Edits Label to show on monitor when preset runs. If the preset is not defined, this is not shown. Refer following page to setup label.

CLR PRESET   CANCEL / OK
Deletes current preset data. If the preset is not defined, this is not shown.

CAM ADJUST   GENERAL / SPECIAL
- **CAM ADJUST_GENERAL:** The general mode means that WB or AE defined 'ROOT MENU>CAMERA SETUP' will be applied to this preset.
- **CAM ADJUST_SPECIAL:** The Special mode means that WB or AE can be set up independently or separately for each preset in each preset setup menu.
- Special WB/AE value should activate only when the camera arrives at each preset location. During jog operation, general WB/AE value should be applied.
- Refer following page to set special WB/AE.

ALARM OUT   - / 1
Relay output can be linked with preset run. ' - 'means off, '1' means on.

 EXIT
```

❷ SCAN SETUP
- Up to 8 scans are available, which makes the camera to move slowly between two preset positions.
- When scan function runs, the camera moves from the preset assigned as the 1st pos. to the preset assigned as the 2nd pos. in CW(Clockwise) direction. Then camera moves from the preset assigned as the 2nd pos. to the preset assigned as the 1st pos. in CCW(Counterclockwise) direction. Then, it continues to move from the 1st pos. to the 2nd pos. back and forth.

If the 1st POS. = the2nd POS.
In case that the preset assigned as the 1st pos. is same as the preset assigned as the 2nd pos., camera turns on its axis by 360° in CW direction and then it turns on its axis by 360° in CCW direction.

If one preset is not defined between the 1st POS. and the 2nd POS.
If case that a position assigned is 'NOT USED', camera turns on its axis by 360° in CW direction from the preset which is 'NOT USED' and then it turns on its axis by 360° in CCW direction.

2st POS.   1st POS.

2. CCW direction

1. CW direction

SCAN NO.   1 ~ 8
Select scan number to edit. If a selected scan is defined, 2 presets will be displayed in the 1st position and the 2nd position.

1ST POS.   PRESET 1 ~ 128, NOT USED
Set up the 1st position for scan function. If a selected preset is not defined, 'UNDEFINED' will be displayed as shown below.

```
SCAN SETUP
-----------------------
 SCAN   NO.  1
*1ST POS.   ✦PRESET 1
 2ST POS.    NOT USED
             UNDEFINED
 SCAN SPEED  30/SEC
```

※Undefined preset cannot be assigned as position. If you press near key when the selected preset is 'UNDEFINED', the preset will returned to previous position(Available preset or 'NOT USED').

2ST POS.   PRESET 1 ~ 128, NOT USED
Same as the 1st pos. setup.

SCAN SPEED   1/SEC ~ 180/SEC
Sets the scan speed.

CLEAR SCAN   CANCEL / OK
Deletes the data in current scan.

❷ PATTERN SETUP
It records the free path of camera by joystic control.

PATTERN NO.   1 ~ 4
Select pattern number to edit. If a selected pattern number is not defined, 'UNDEFINED' will be displayed under selected pattern number.

CLR PATTERN   CANCEL / OK
Deletes data in the current pattern.

❬EDIT PATTERN❭
Moves to edit the pattern assigned.

❸ EDIT PATTERN - Select the Position
1. By using joystick, move to start position.
2. By using joystick, move to the appropriate zoom.
3. To start pattern recording, press near key.

❹ EDIT PATTERN - Records the Path
1. Move camera with joystick of controller or run preset function to memorize the path (mostly curve path) in a selected pattern.
2. The total memory size and the rest memory size is displayed in the form of bar. (Refer screen 5)

 ※ If bar is full as below, the camera does not record any more paths.

```
EDIT PATTERN    1
■■■■■■■■■■■■■■■■■■■■■■■■
TIME LIMITE...------------
```

 ※ The pattern path includes the zoom magnification.
3. To save data and exit, press near key.
4. To cancel recording and delete the recorded data, press far key.

※ When pattern is edited or ok, pan/tilt will turn to 'AUTO FLIP> OFF' temporarily.

2 GROUP SETUP SCREEN

The group function allows running sequence of presets, pattern and/or scans. Max. 8 group can be stored. Each group can have max. 20 action entities which can be preset, pattern or scan.

Dwell Time

Preset 1 → Pattern5 1 Times ····› Pattern5 n Times → Scan3 1 ····› Preset 120

Max. 20 Entities

GROUP NO.   1 ~ 8
Selects group number to edit. If a selected group number is not defined, 'UNDEFINED' will be displayed under the selected group number.

CLEAR GROUP   CANCEL / OK
Deletes data in the current group.

‹EDIT GROUP›
Moves to edit the group assigned.

3 EDIT GROUP - Initial Screen

To edit group, press near key to move screen 4.
At the current screen, if moves joystick Down, the cursor will move to 'SAVE' menu.

NO.   1 ~ 20
Means the sequence of the function in a group.
The functions will be run from lower no. to higher no. by sequence.

ACTION NO.   NONE / PRESET 1~128(Excluding 95) / PATTERN 1~4 / SCAN 1~4
Select the function.
Select the function no. separately.

DWELL TIME   00:03 ~ 04:00 (min:sec)
Sets dwell time between function by moving joystick Up/Down. If the 'OPT' of pattern/group is set to repeat more than twice, it means the repeat interval.

OPT   PRESET: 2~360 / PATTERN & SCAN: 1~255
It should be preset speed when preset is set in 'ACTION'. It should be the number of repeat when pattern or scan is selected in 'ACTION'.

4 EDIT GROUP – Select Function Sequence

Note that max. 20 functions are allowed in a group.
Move cursor Up/Down to rotate among 20 functions.

5 EDIT GROUP - Assign Function

Move cursor to the 'NO.' to assign the function, press near key to set up. Select the function by moving joystick Up/Down.

6

```
EDIT GROUP          1
 NO. ACTION NO. DWELL OPT

✦ 1 PATTERN 1   00:03  1
  2 NONE
  3 NONE
  4 NONE
  5 NONE

 SAVE    [←→:MOVE CURSOR]
 CANCEL  [↑↓:CHANGE VAL.]
```

Press Near/Enter Key

7

```
EDIT GROUP          1

✦SAVE
 CANCEL
```

6 EDIT GROUP - Assign Function

Move cursor Left/Right to select items and move cursor Up/Down to change each value.

7 EDIT GROUP - Select Function Sequence

▩ The function undefined cannot be set as action.

e.g.) If 'PATTERN 1' is not defined at 'ROOT MENU>FUNCTION SETUP>PATTERN SETUP', then the 'ACTION 1' will be automatically changed to 'NONE'.

```
EDIT GROUP          1
 NO. ACTION NO. DWELL OPT

✦ 1 PATTERN 1   00:03  1
  3 NONE
```

Press Near Key

```
EDIT GROUP          1
 NO. ACTION NO. DWELL OPT

✦ 1 NONE
  3 NONE
```

‹In case that 'PATTERN 1' is not defined.›

8 EDIT GROUP- Saves the Setting

After finishing setting up all actions, place cursor on 'SAVE' . Then, press near key to save data.

② **SCHEDULE SETUP SCREEN**

- The schedule function allows running the appropriate function like preset, scan, group, pattern, home move at designated day and time.

 e.g.) if you setup a rule 'Tuesday at 9:00AM' and 'Preset 1 (say main gate)', the camera will move to main gate every Tuesday at 9:00AM.

- It is noted that due to the real time clock (ROOT MENU>SYSTEM SETUP>DATE/TIME SETUP), the time data will be kept regardless of blackout. The initial time and day setup is essential to proper schedule function.
- Max. 7 schedules are allowed.

MASTER ENABLE	ON / OFF

Decide whether schedule function is active or not.

DAY	UNDEFINED / ALL / WKD / SUN ~ MON

Set the day for scheduling.
- **Undefined:** Inactivate
- **All:** Applies to every day
- **WKD:** Applies to every day except Sunday
- **SUN-MON:** Applies to designated day only

TIME	00:00 ~ 23:59 (hour:min)

Set the time.

ACT NO	HOM(HOME) / PRS(Preset) 1~128(Excluding 95) / SCN(Scan) 1~8 / PTN(Pattern) 1~8 / GRO(Group) 1~8

Set the function and no.
▨Unlike the group, the undefined function can be assigned in schedule. However, no action is taken at the schedule.

ON	ON /OFF

Decide to make this rule effective or not.

④ ⑤ **SCHEDULE SETUP - Assign Value**
Each field (DAY, TIME, ACT, NO., ON) can be selected by Left/Right keys and the values in the field are changed using Up/Down keys.

⑥

```
SCHEDULE SETUP
   MASTER ENABLE      OFF
     DAY TIME  ACT NO ON
  ✦1  ALL 12:00 PRS 128 ON
   2  UNDEFINED
   3  UNDEFINED
   4  UNDEFINED
   5  UNDEFINED
   6  UNDEFINED
   7  UNDEFINED
  BACK
```

⑥ **SCHEDULE SETUP - Save Edited Setting**
To save data and exit, press near key.

▨ If there are rules conflicts to each other, the higher number is, the higher priority has.

 e.g.) The camera will move to 'Preset 127' at 12:00 on every Wednesday although 'Preset 128 and 127' were set at 12:00 on every Wednesday.

```
SCHEDULE SETUP
  ✦MASTER ENABLE      OFF
     DAY TIME  ACT NO ON
   1  ALL 12:00 PRS 128 ON
   2  WED 12:00 PRS 127 ON
   3  UNDEFINED
   4  UNDEFINED
   5  UNDEFINED
```

① CAMERA SETUP

Setup the general functions of zoom camera module.

FOCUS MODE   AUTO / MANUAL / SEMIAUTO
Sets camera focus mode.

- **SEMIAUTO:** This mode exchanges focus mode automatically between manual focus mode and auto focus mode. Manual focus mode activates in preset operation and auto focus mode activates when jog operation starts.

- **MANUAL:** With manual mode at presets, focus data is memorized in each preset in advance and camera calls focus data in correspondence with presets as soon as camera arrives at a preset.

DIGITAL ZOOM   ON / OFF
Sets digital zoom function to 'ON' or 'OFF'. If this is set to 'OFF', optical zoom function runs but zoom function stops at the end of optical zoom magnification.

IMAGE FLIP   ON / OFF
Sets if the image should be reversed or not.

<WHITE BALANCE SETUP>
Move to 'WHITE BALACE SETUP' screen.

<AUTO EXPOSURE SETUP>
Move to 'AUTO EXPOSURE SETUP' screen.

② WB SETUP

WB MODE   AUTO / MANUAL
Red and blue level can be set up manually only in manual mode.

RED ADJUST   10 ~ 60
Adjust the red color value. It can be set only in manual mode.

BLUE ADJUST   10 ~ 60
Adjust the blue color value. It can be set only in manual mode.

③ WB SETUP - Set WB Mode to Manual

If WB mode changes to 'MANUAL', the value of 'RED ADJUST' and 'BLUE ADJUST' shows on the screen.

④ ⑤ WB SETUP - Change WB Color Value

- If WB mode changes to 'MANUAL', the color value of 'RED ADJUST' and 'BLUE ADJUST' can be set up manually.
- To save data and exit, press near key.

OSD - CAMERA SETUP>AE SETUP

  EXIT
```

② AE SETUP

Setup the video related function of zoom camera module.

BACKLIGHT   OFF / LOW / MIDDLE / HIGH
Sets the backlight compensation.

DAY/NIGHT   AUTO1 / AUTO2 / DAY / NIGHT
'AUTO1' exchanges day/night mode faster than 'AUTO2'.

BRIHGTNESS   0 ~ 100
Adjusts the brightness of images.

IRIS   AUTO / MANUAL
- **If iris is set to 'AUTO',** iris should have highest priority in adjusting AE and shutter speed should be fixed.
- **If iris is set to 'MANUAL',** iris should be fixed and iris has lower priority in adjusting AE, in comparison with others.

SHUTTER   ESC / A.FLICKER / MANUAL
- **If iris is set to 'MANUAL' and shutter speed is set to 'ESC',** shutter speed should have highest priority.
- **Shutter speed is set to 'A. FLICKER', to remove flicker,** shutter speed should be set to 1/100 sec. for NTSC and 1/120 for PAL.

AGC   OFF / NORMAL / HIGH
Enhances the image brightness automatically in case that luminance level of image signal is too low.

SSNR   OFF / LOW / MIDDLE / HIGH
Enhances the images by deducting noises when gain level of images is too high.

SENS-UP   AUTO / OFF
- Activates the slow shutter function when luminance of image (signal) is too dark.
- It is possible to set up the maximum number of frames piled up one on another by Slow Shutter function.

③ MANUAL IRIS SCREEN

**IRIS LEVEL**   0 ~ 100

**④ MANUAL SHUTTER SCREEN**

SHUTTER SPD   x128 ~ 1/120000

⑤ AUTO SENS-UP SCREEN

SENS-UP LIMIT   x2 ~ x128

❶ SYSTEM SETUP

<DATE/TIME SETUP>
Moves to 'DATE/TIME SETUP' screen. Refer screen 2 below.

<RELAY TYPE>
Moves to 'RELAY TYPE' setup screen. Refer screen 3 below.

<PASSWORD>
Moves to 'PASSWORD' setup screen. Refer screen 4 below.

<SET HOME POSITION>
Moves to 'SET HOME POSITION' screen. Refer screen 5 on page 39.

<SET NORTH DIRECTION>
Moves to 'SET NORTH DIRECTION' screen. Refer screen 6 on page 39.

LANGUAGE   ENGLISH / ESPAÑOL / FRANÇAIS / DEUTSCH / ITALIANO / РУССКИЙ / PORTUGUÊS
Select a preferred language among English, Spanish, French, German, Italian, Russian and Portuguese.

<FAN/HEATER SETUP>
Moves to 'FAN/HEATER SETUP' screen. Refer screen 7 on page 39.
※ This setup is only applicable for fan/heater model.

❷ DATE/TIME SETUP

DATE   01 / JAN / 2000 ~ 31 / DEC / 2037
Date is displayed in dd/mm/yy format.

1. If you press the near key, the focus will be placed on 'dd'.
2. Sets date moving joystick Up/Down.
3. Moves joystick Left/Right to move to date-month-year.
4. The values in the field are changed using Up/Down keys.
※ The day is automatically calculated when you set the day.

TIME
Time is displayed in HH:MM:SS format.
Sets time same as setting date.

❸ RELAY TYPE SETUP

RELAY1   NORMAL OPEN(N.O) / NORMAL CLOSE(N.C)
- Contacts type of relay out are defined.
- Refer page 14 for the detailed information.

❹ EDIT PASSWORD

- Sets the 4 characters long password. If this function is set to 'ENABLE', the password is required whenever you enter OSD menu. The master password is '4321'.

※ To input password, refer 'LABEL' on page 29.

OSD - SYSTEM SETUP

❺
```
SET HOME POSOTION
----------------------

 MOVE TO TARGET POSITION
 [NEAR:SELECT/FAR:CANCEL]
                 0/0/x1/E
```

❻
```
SET NORTH DIRECTION
----------------------

 MOVE TO TARGET POSITION
 [NEAR:SELECT/FAR:CANCEL]
                 0/0/x1/N
```

❼
```
FAN/HEATER SETUP
----------------------
◆FAN RUN TEMP      40℃
 HEATER RUN TEMP   5℃

 BACK
 EXIT
```

❺ SET HOME POSITION
- Home position means the origin of pan angle calculation. The value of pan angle displayed on the screen is based on this home position.
- By using joystick, move the camera to the desired position and press near key.
- Home is not effective to tilt angle.
- If you change the location of the home position, all horizontal location of functions such as preset, scan, pattern, group and privacy zone mask will be shifted based on the changed home position.

※ Set Home Position?
When you replace the camera block or the orientation of camera is changed due to maintenance operations, it is very difficult to maintain the same pan orientation. Therefore, all function data depending on pan orientation such as preset, scan, pattern, group and privacy zone mask are not useful any more accordingly. However, even in this case, you can reuse the data if you redefine set home position on the previous home position.

※ For setup, refer 'EDIT SCENE' on page 28.

❻ SET NORTH DIRECTION
The direction will be displayed on the right-bottom of the screen, pan is '0' and direction is 'N'.
```
[NEAR:SELECT/FAR:CANCEL]
              0/0/x1/N
```

❼ FAN/HEATER SETUP
Sets the fan/heater enabled/disabled according to the temperature.
※ This menu will be displayed only for fan/heater model.
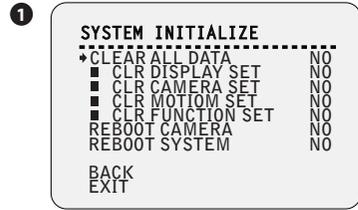

FAN RUN TEMP   30℃ ~ 80℃ (86°F ~ 176°F)
Above this temperature, the blower fan will start automatically.

HEATER RUN TEMP   -10℃ ~ 20℃ (14°F ~ 68°F)
Below this temperature, the heater will be tuned on automatically.

3 | OSD - SYSTEM INITIALIZE

❶
```
SYSTEM INITIALIZE

 REBOOT SYSTEM           NO

 BACK
 EXIT
```

❶ **SYSTEM INITIALIZE**

Initializes to the camera setting.

CLEAR ALL DATA   ON / OFF
Deletes all configuration data such as display, camera, motion setup and so on.

CLR DISPLAY SET   ON / OFF
Initializes display configuration.

CLR CAMERA SET   ON / OFF
Initializes camera configuration.

CLR MOTION SET   ON / OFF
Initializes motion configuration.

CLR FUNCTION SET   ON / OFF
Deletes preset data, scan data, pattern data, group data and schedule data.

REBOOT CAMERA   ON / OFF
Reboots zoom camera module.

REBOOT SYSTEM   ON / OFF
Reboots speed dome camera.

▨ OSD menu contents on page 22, 23, default values of each content are marked in bold.
